ENGRAMS

WHERE TECHNOLOGY MOLDS INTO FORM

ENGRAMS

WHO ARE WE?

We are Engrams: a development studio with deep, hands-on expertise, ready to take on any challenge and transform your most daring, creative visions into reality. We steer your project from initial concept to its full realization in production, distinguished by three defining qualities:

Exceptional skill and expertise

Development speed that consistently surpasses the competition

Pricing — well below market rates

We strive for perfection in every detail, delivering swift execution and optimal pricing.

WHAT DO WE DO?

Our expertise lies in developing web2 and web3 solutions of any complexity. Our core activities include creating mobile applications, websites, landing pages, and complex web platforms — from e-commerce stores to social networks and games. We also develop unique Telegram Bots and Telegram Mini Apps with custom logic and interaction systems.

At the same time, you won't need to worry about finding other contractors for the remaining tasks: we handle the entire lifecycle of your project. This includes design (UI/UX, branding, web design), creating tokenomics for applications, marketing support, and DevOps services. We also integrate payment systems (fiat/crypto) and develop complex marketing structures for your business.

PRODUCT CONCEPT DEVELOPMENT

We help develop your product concept from the ground up — from the initial idea to a complete implementation plan. This includes market analysis, functionality selection, and creating a roadmap for a successful launch.

ENGRAMS

TELEGRAM MINI APP & TELEGRAM BOT

We create custom Telegram bots and mini-apps with various logic, including idle/tap systems, admin panels, roulettes, cases, crafting systems, clan/group structures, and social tasks.

MOBILE APP
& PWA

We develop mobile applications for iOS and Android, as well as Progressive Web Apps (PWA), which provide users with a native app experience through the browser.

ENGRAMS

WEBSITE & LANDING

We create modern and functional websites and landing pages focused on attracting audiences and driving conversions, with an emphasis on fast loading speeds, responsive design, and SEO optimization.

COMPLEX
WEB APP

We develop complex web applications: e-commerce stores, social networks, gaming web platforms, and other interactive projects with a high level of user engagement.

DESIGN

We create user interface and flow designs (UI/UX), develop brand identity (branding), brand books, and design social media profiles and brand merchandise.
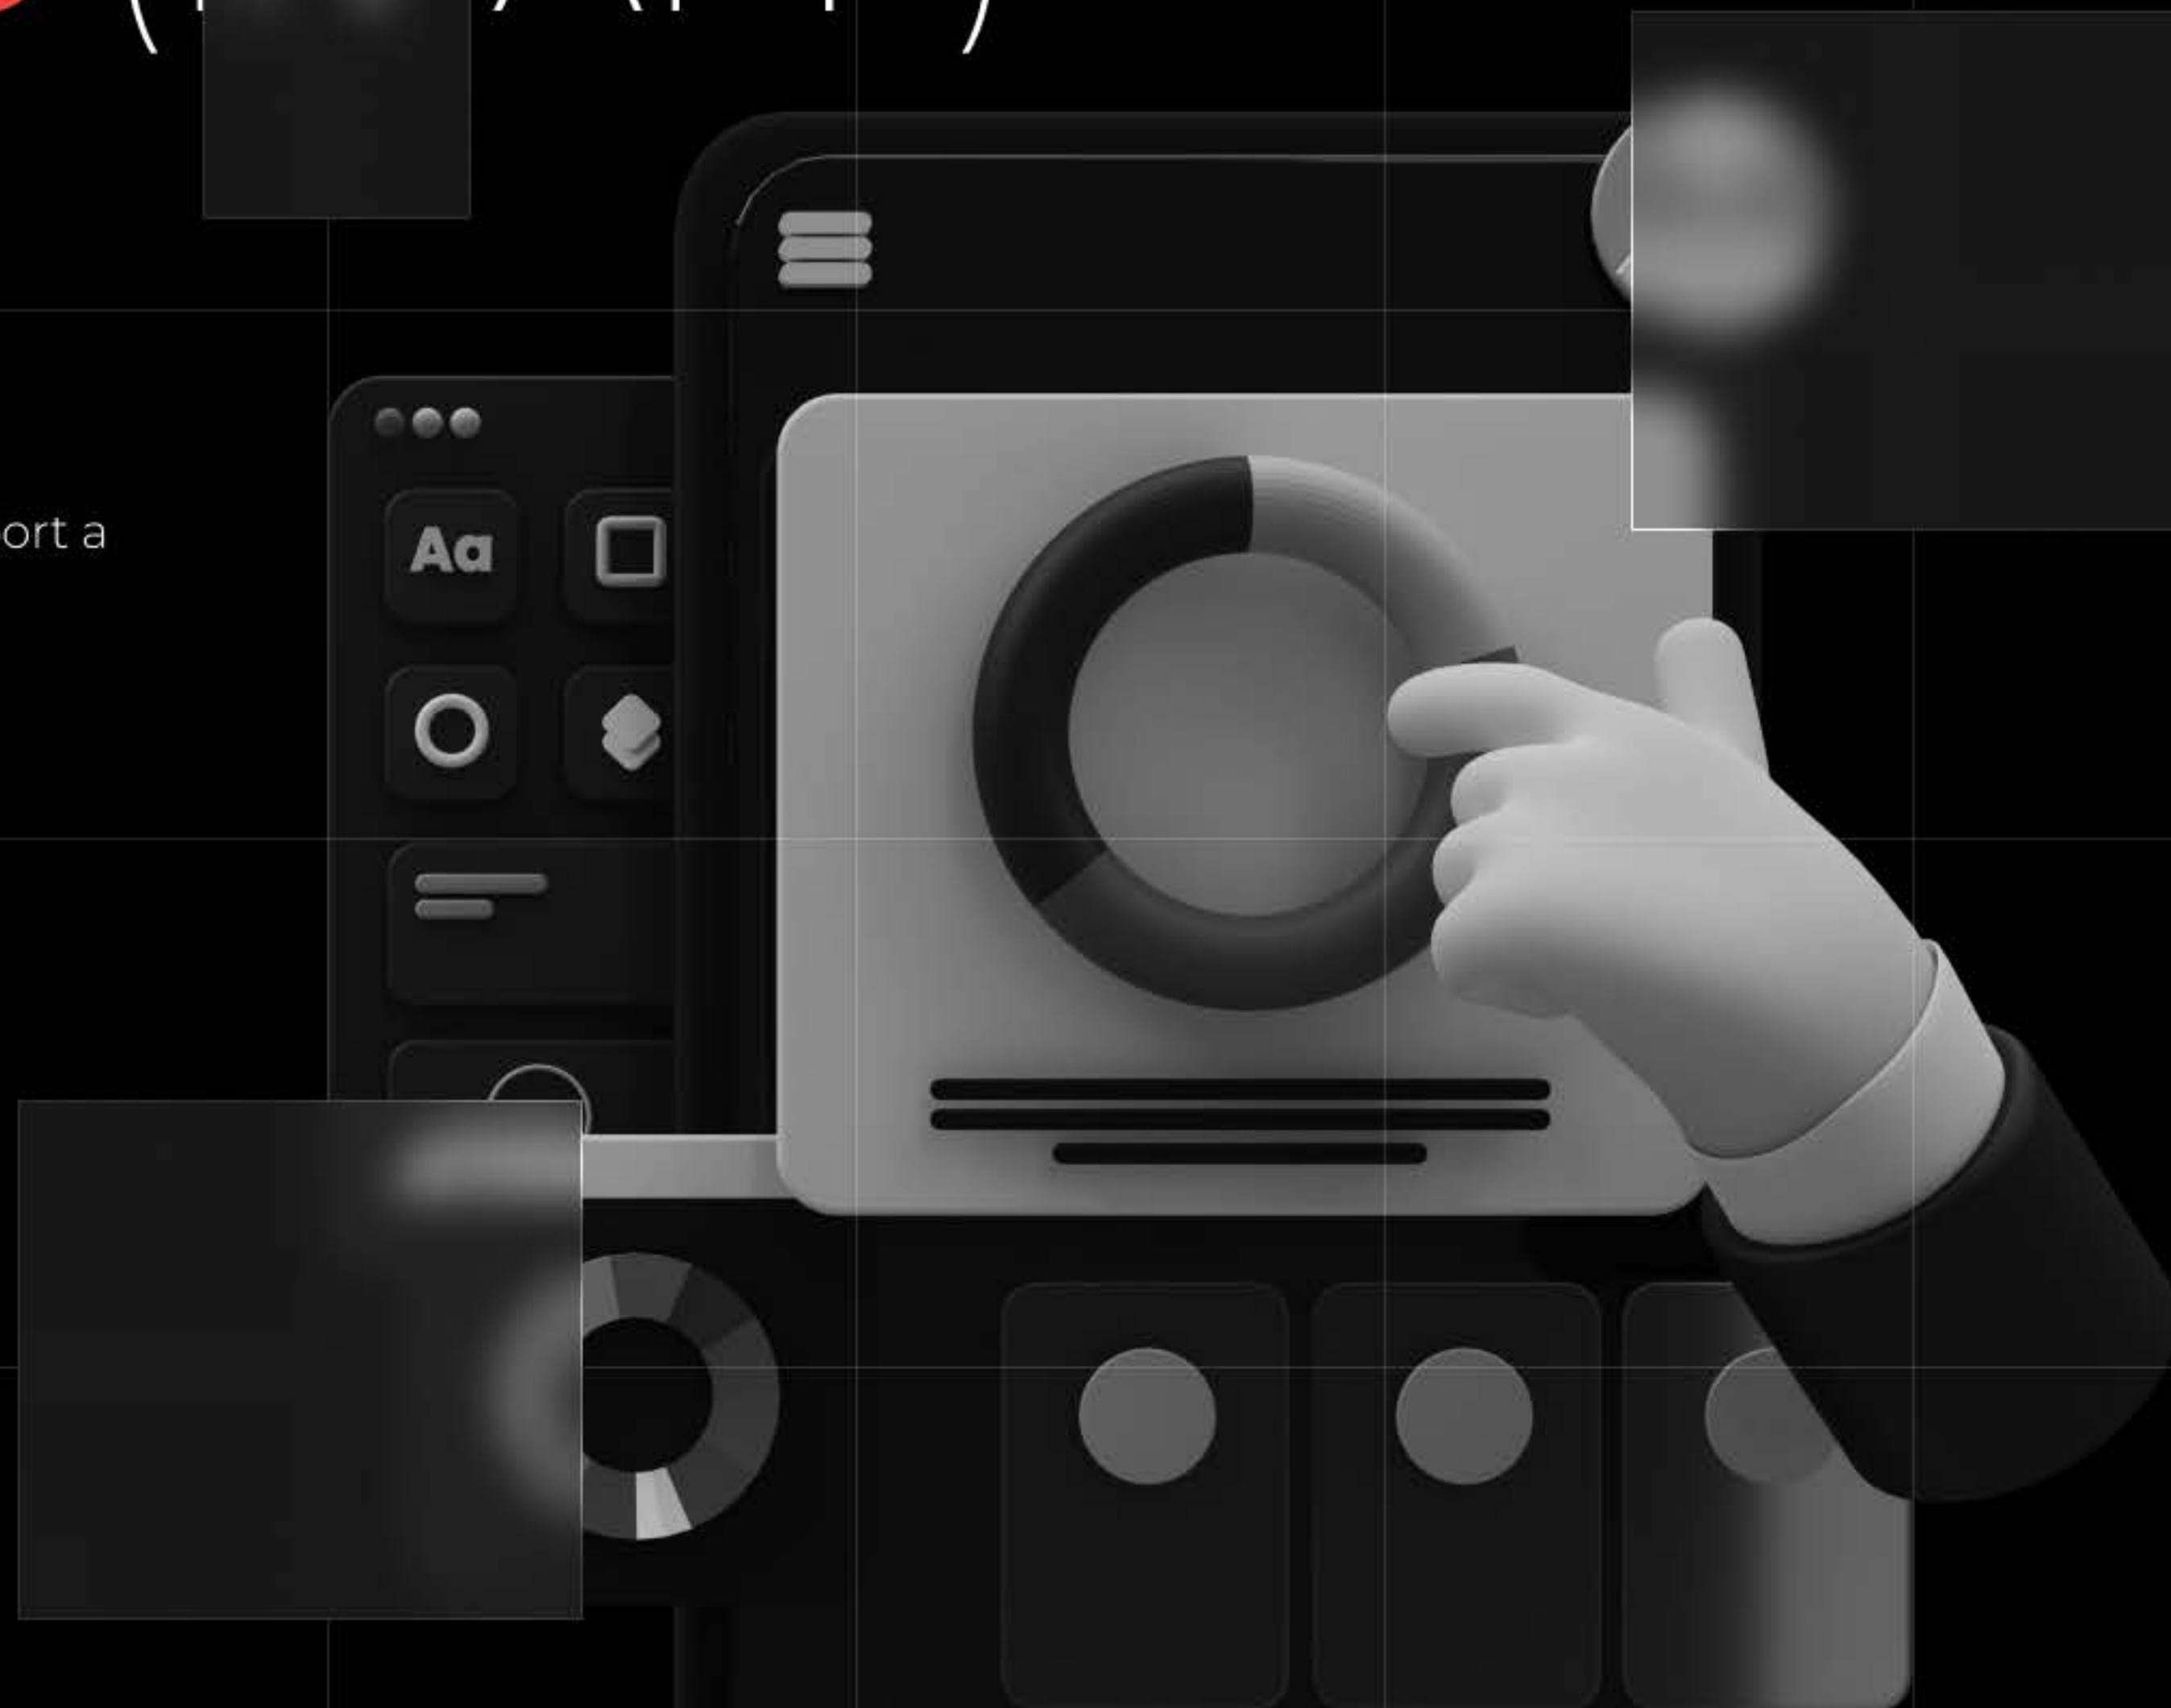

DEVOPS
SERVICE

We provide DevOps services for automating the deployment, scaling, and monitoring of your product, ensuring its stability and security.

TOKENOMICS (IN-APP) DESIGN

We design and implement token-based economic systems for applications and platforms that incentivize user activity and support a sustainable, well-balanced ecosystem.

PITCH DECK
DEVELOPMENT

We create compelling and visually appealing presentations to attract investors, showcasing your product in the best light and highlighting its unique advantages.

ENGRAMS

ACQUIRING SYSTEMS
(FIAT/CRYPTO PAYMENT)

We integrate payment systems to accept both fiat and cryptocurrency payments, providing secure and convenient payment options for your customers.
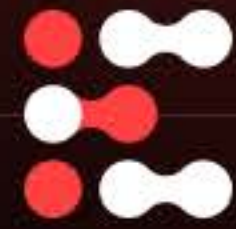

MULTILEVEL
MARKETING
SYSTEM

We develop multi-level marketing (MLM) systems that help organize complex affiliate programs with bonuses and incentives for participants.

DEMO-TRADING SYSTEM

We create demo trading systems where users can learn or practice trading without the risk of losing real funds, using market simulations and real-time coin quotes.

ENGRAMS

WE ARE OPEN TO ANY IDEAS

— whether they are the most creative concepts or the most complex projects.

Reach out to us, and we'll help turn your ideas into reality. As a bonus, you'll receive one of three gifts — but which one? You'll find out when we talk!
