Victor Morgan UIUX Designer

📞 +234 903 911 3926   ✉ vmorganafc@gmail.com   𝕏 @vmorgan_

> Passionate Web3 UIUX designer with a 3 year experience in turning complex challenges into intuitive solutions. I thrive on finding innovative ways to improve user experiences while keeping a keen eye on aesthetics. I am well versed in understanding problems and providing solutions in both the Web 2, Web 3 and DEFI space.

Experience

These experiences highlights my activities on strictly web3 projects. Other experiences on web2 design activities are available on request

EduLaunchBox (Development/ Utility project)
August, 2024 - August, 2024

The gateway to the OpenEdu ecosystem. It allows developers to Launch & migrate tokens & dApps in minutes!

- **Research:** Due to the urgency of the product, my research was focused on competitor analysis. Since there were competitors, the tool was very much needed thus validating the idea. I did further research into the use case, features and the most suitable user flow.
- **Wireframing:** In establishing client heeds and project requirement, detailed sketches were made with content strategically positioned to fully capture stakeholder requirements and clients needs.
- **Design and Prototyping:** With the help of UI mood board, we were able to establish the theme and tone. The High fidelity designs were created, prototyped and approved. This followed collaboration with Developers.

HackerX (Hackathons + Education)
January, 2024 - February, 2024

Empowering African builders in blockchain, AI and Robotics by providing education and funding opportunities to help them launch and scale globally.

- **Research:** User research and competitor analysis carried out to ascertain what user needs are and what competitors have done and aren't doing right.
- **Brainstorming:** We Generated innovative design concepts and ideas through brainstorming sessions, sketching while ensuring alignment with project objectives and user requirements.
- **Design and Prototyping:** Once requirement were established, wireframes were prepared, High fidelity designs was created and prototyped. We carried out several tests to ensure it works.

Zeit protocol (DEX)
June, 2023 - Present

The first Ecosystem of interconnected Defi Dapps Launching on @artherachain. Zeit aims to launch a suite of product on the Arthera chain.

- **Research:** Research began by identifying a problem that needed to be solved on the Arthera chain. As a first mover, I did a competitive analysis on the performance of previous projects launched on other chain.
- **Brainstorming:** Explored various solution relevant to the ecosystem, analyzed bottlenecks and developed wireframes.
- **Design and Prototyping:** Detailed designs were made, reiterated and prototyped. I maintained communication with developers to ensure that final build matched design.

Other projects

Puppylovecoin (Meme)
January, 2023 - April, 2023

Blockscape (GameFI)
June, 2023 - Present

Education

Interactions designs foundation
July 2022
Become a UX Designer from Scratch
Top 10% (Distinction)

Federal Polytechnic, Auchi.
November, 2018
Quantity Surveying
3.60 CGPA (Distinction)

Skills

- Design systems
- User Research
- Style guides creation
- Web3 Native
- App testing
- Graphic Design
- Branding
- Prototyping
- Illustration and 3d with spline
- Iterative Design Refinement
- Strong communication skills
- Community builder

Tools

- Figma
- Jira
- Notion
- Adobe Suite
- Microsoft suite
- Spline

Language

- English *(Fluent)*

Interests

- Cryptocurrency
- Memes
- Defi
- DEX
- Zero knowledge proofs.
