EXPERTISE

- Fullstack development using MERN stack
- Front-end: React.js, Redux, ES6+, HTML, CSS.
- Back-end: Node.js, Express.js, MongoDB (NoSQL).
- RESTful API design and development.- Responsive web design and user interface (UI) development.
- Version control with Git/GitHub.- Problem-solving, debugging, and code optimization.- Agile/Scrum development and collaborative teamwork.
- Expert in Flutter Development: Proficient in building cross-platform mobile applications using Flutter framework.
- UI/UX Design Implementation: Capable of translating design mockups into responsive and visually appealing user interfaces using Flutter widgets.
- API Integration: Experience in integrating RESTful and GraphQL APIs into Flutter applications, ensuring smooth data flow and communication with backend services.
- Continuous Learning and Adoption of Best Practices: Committed to staying updated with Flutter updates, emerging technologies, and industry best practices to deliver cutting-edge solutions.

SUMMARY

Results-driven Full Stack Developer with strong expertise in Flutter development and the MERN (MongoDB, Express.js, React.js, Node.js) stack. Proven track record of designing and implementing innovative, scalable, and efficient software solutions. Extensive experience in building and optimizing mobile applications using Flutter, with proficiency in state management through GetX and reactive programming with RxStreams. Demonstrates strong analytical and problem-solving skills with a deep understanding of web and mobile development best practices. Adept at collaborating with cross-functional teams to deliver high-quality applications within tight deadlines. Skilled in front-end and back-end development, API integration, and database management. Committed to staying current with emerging technologies and continuously enhancing skills to deliver cutting-edge solutions. Passionate about creating seamless user experiences and driving project success.

WORK EXPERIENCE

Full Stack developer

Starrpower Technologies

2022- 2023

- Designed and developed web applications using the MERN stack.
- Created interactive and user-friendly front-end interfaces with React.
- Built robust back-end APIs using Node.js and Express.js.
- Managed data storage and retrieval with MongoDB (NoSQL).
- Collaborated with cross-functional teams to deliver agile projects on time.
- Contributed to the design and architecture of scalable software solutions.

Backend developer Intern

Executive Outliers

May - July 2023

- Managed company inventories for Office Furniture
- Built a sustainable sync between Shopify and Sitehound (inventory)
- Used NodeJs to monitor changes on Shopify
- Used Amazon S3 api to manage file management
- Used Amazon EC2 cloud infrastructure to host it online

Backend developer

Krubbs

Feb - July 2023

- Built scalable Backend infrastructure
- Used NodeJs to receive payments via different payment gateways
- Used NodeJs to monitor changes on each user's shop
- Used Amazon S3 api to manage files
- Used Amazon EC2 cloud infrastructure to host it online
- Built an outstanding login system

Mobile App Developer

Quru Lab

Feb 2024 - present

- Developed and maintained cross-platform mobile applications using Flutter framework.
- Implemented efficient state management using GetX, enhancing application performance and responsiveness.
- Integrated RESTful APIs into Flutter applications to facilitate seamless data flow and interaction with backend services.
- Utilized RxStreams for reactive programming, ensuring real-time data updates and smooth user experiences.
- Collaborated with designers and backend developers to translate UI/UX designs into functional Flutter widgets and features.
- Conducted thorough testing and debugging of Flutter applications, including unit tests and widget tests, to ensure high reliability and quality.
- Stayed updated with Flutter updates, new features, and best practices to continually improve development processes and deliver cutting-edge solutions.
