OBJECTIVE

The pages and sites that I get, I find the size of the audience, where they are located, what they do and what they like, from what age group there are more people on the page, and most of them are women or men, and according to that, I produce the content of the page and site. It increases sales and focuses on a segment of the market

You also know that taking a part of the market is better than working in a branch

I also create content and interaction and activities and advertisements according to these statistics, and in the end, I turn the business that I started into a brand or multiply the sales of the brand.

It is worth a try
