PROFILE

I am a 27 years old self-taught web developer with a strong eye for innovative Blockchain technologies and a keen understanding of zero knowledge proof techniques geared toward optimum blockchain user experience. Introduced to and worked with CMS like Wordpress and vBulletin since I was 16. I graduated with bachelor degree of mechanical engineering and worked for 3 years as Leading mechanical role after that found out about Bitcoin early 2018 and got interested in blockchain since then. Started to get programming more seriously so Tried to understand how EVM and Cryptography works, took courses and built some cool Dapps like first Persian DEFI front-end, Defi Dashboard, Web3 Marketplace,Web3 social network ….

EXPERIENCE

PER Solar Company
2016 > 2019

Freelancer
2019 > current

IT engineer

I worked as IT engineer, developed and managed website and social networks of company.

Web3 Developer

As i gain more experience as a smart contract developer in Web3 space try to keep myself up to date with latest concepts in industry like ZK-snarks. Although started my web3 journey with Moralis platform which is perfect for junior devs, right now trying to get deep into Ethereum Virtual Machine and assembly. Looking for passioante team to learn from and work with remotely. These platforms developed by me :

Defi Dashboard : https://kebab-finance.vercel.app
Ethereum Course Marketplace on Ropsten : https://marketplace-web3.vercel.app
First Persian language Defi Front-end : https://app.liquity.ir
Decentralised social network on Polygon : http://polytter.fun
