

PROFILE

I have been producing textual content for more than 3 years. I started my work as an intern for a famous technology blog. I had bad days and good days but finally i understand the importance of content writing as a real career. Then i learned about SEO and WordPress and another world of digital marketing. So i decided to go one step further and started to study English literature to become an academic writer. I'm now ready to take my writing experience into a new level and continue to grow by accepting bigger challenges.
