## About Me

I am an experienced frontend developer specializing in React UI/UX interface development for major products at a startup. I have 2.5 years of professional react/web3 experience. With expertise in React, NextJS, solidity, Sass, TypeScript, Jest and web3 technologies, I am committed to delivering exceptional user experiences with optimized performance. Thriving in dynamic startup environments across various industries, I bring valuable insights from my previous experiences in frontend development, contributing to innovative solutions and growth.

## Experience

### Frontend Developer (Full Time)

Pandora Finance (September 2021 - November 2023)

- I developed high-performance and scalable web3 applications from the designs using ReactJS, NextJS, React Query, Redux, and Web3.js. My focus was to translate user and business needs into great user experiences.
- I oversaw frontend projects, created web pages, integrated with smart contracts, and utilized tools such as Wagmi, Subgraph, and Moralis for data storage.
- I built full-fledged NFT Marketplaces which were cross-browser compatible for our clients using our SDK and always striving to give better experiences to our clients and users.

### Frontend Engineer (Freelancer)

Plena Finance (May 2022 - August 2022)

- I improved the new page which has various media elements, resulting in a 20% boost in performance and a 60% reduction in load time. This made the project quicker and smoother.

### Frontend Developer (Intern)

The Tarzan Way (September 2020 - December 2020)

- I made a form page system with React and styled components that uses JSON schema. It reduces form development time by 80% for our organization.
- I worked alongside the backend engineers to document, debug, and test the form system. Additionally, I integrated the backend RestAPIs to ensure smooth functionality.

## Skills

- Advanced: JavaScript ( ES6+ ), HTML, CSS, React, web3.js, Redux, Zustand, NPM/Yarn, Next.js, TypeScript
- Proficient: React Query, Jest, React Testing Library (RTL), Node.js, Bootstrap, jQuery, Express.js, Sass, Git, GitHub, EJS, Responsive Web Design, MongoDB, SPA, MySQL, REST APIs, ethers.js, Viem, GraphQL, Apollo Client
- Basic: C, D3.js, Webpack, Mocha, Chai, Enzyme, React Native, API design, Scrum/Agile development
- Testing: Unit testing, Integration testing, and Snapshot testing
- Software: VScode and Figma

## Education

### Bachelor of Robotics Engineering

IU International University of Applied Sciences (September 2022 - February 2026)

### Bachelor of Computer Technology

University of Computer Studies, Mandalay (UCSM) (December 2018 - February 2023)
