CI / CD   monorepo   rxjs   UX / UI   Google Tag Manager   MUI material   Bootstrap

Driving experience

Driver's license category B

About me

I've been travelling a lot lately. I left my country in 2022. I travelled through the following countries: Kazakhstan - Turkey - Montenegro - Serbia - Bosnia and Herzegovina - Georgia - Azerbaijan - Dubai (UAE) - Sri Lanka. Now I am trying to legalise in Serbia.

Due to my full-time commercial studies at the institute, it was not possible to get a full-time job in a company. It was necessary to combine the institute and work, so I was constantly working part-time in different companies. At the moment, I graduated from the Bachelor's Degree in Urban Planning and Master's Degree in Military Architecture at MArchI. Now I am getting a PhD in economics.

Having determined the field I am interested in (IT), I am looking for a vacancy with the prospect of realising and improving my skills.

I currently possess the following skill stack for the position applied for:
- Next.js
- NestJS
- PostgresSQL
- web3.js / ethers.js / anchor / opensea (seaport sdk) / rarible (sdk) / google big data
- Solidity / abi / ipfs / remix / OpenZeppelin / oracle
- ERC-20 / ERC-721 / ERC-1155 / IERC / BEP
- AWS (amplify / pipeline / beanstalk / EC2 / Route 53 / RDS / Secret Manager)
- Google Cloud Console
- React / Angular / Vue.js
- rxJS
- GraphQL / REST API / socket.io
- TypeScript / JavaScript (ES)
- scaffold / hardhat / mataplex / ganache / truffle
- Webpack / gulp
- eslint / prettier / babel
- i18n
- monorepo
- docker
- mui / antd / bootstrap
- styled-components / SASS / LESS
- github / gitlab / bitbucket
- CI / CD (aws + github) (QA stand & PROD stand)
- Atlassian (Jira, Bitbucket, Confluence) / GitHub kanban
- Figma / Photoshop / Adobe illustrator
- Miro / Balsamiq
- Postman
- BrowserStack
- metamask / walletConnect / Phantom
- EVM (ethereum / polygon / bsc) / bitcoin / solana / immutableX / Rise of Elves / tron / localnet
- html / CSS (BEM, ITCSS)

Other programming skills:

- Unity

- Flutter (iOS, android)

- Review and Testing

- nginx / apache

- SQL

- C#

- webGL / theree.js / Canvas / SVG

I came to the conclusion that designing in architecture and designing in IT are similar in many ways. And programming, as well as architecture, gives an opportunity to keep a creative approach to solving tasks.

I am interested in astrophysics, astronomy, rocket science, psychology, chess and playing ping-pong.
