Birth date: 09/01/2003

ABOUT ME

I consider myself a self-taught and creative developer that can bring problem-solving skills.

I'm keen on Blockchain technology as well as security in smart contracts. Thus, I'm really motivated and willing to learn whatever it takes to become a great developer.

Presently, I'm taking part in hackathons and learning smart contract security by doing CTFs.
In my spare time I enjoy reading and working out.

LANGUAGES

Spanish: Native
English: Advanced level
