### Skills

#### Programming

##### Languages:

Javascript, Typescript, HTML,  
CSS, PHP, C#, Java

#### Front-end

##### Frameworks:

Angular, React, Next.js, Vue.js

#### Back-end

##### Frameworks:

Node.js, Express, Laravel

#### Databases:

MySQL, MongoDB, PostgreSQL,  
Redis

#### DevOps

##### tools:

Docker, Git, AWS, Bitbucket

#### Agile

##### Methodologies:

Scrum, Kanban, Jira

### Education

#### Bachelor of Computer Science,

New York University

April 2013 – April 2017

### About me

Experienced and professional Front End Developer with 5 years of experience and got a Computer Science degree from the University. Focused on detail and accuracy and learned excellent problem-solving skills and the important ability to work in fast paced team environments from it. Always got used to meet requirements and produce all assigned results with more than 99%. Worked in various domains from web component creation to system architecture design and outstood by finding a solution in a faster and better way.

### Professional Experience

#### We45, Front End Developer

January 2023 – August 2023 | California, United States

- Used Vuex for state-management as a centralized store for all vue components, introduced Pseduo-Classical Pattern to deal with the Javascript objects reducing memory usage by 40%.
- Implemented authentication and session management for web applications with Supertokens
- Accomplished and executed the beautiful, consistent user interface for project with Vuetify improving user satisfaction by 20%.
- Embodied vue.js mixins, resulting in a 20% improvement in code reusability at the application level.
- Integrated pre-built filters and directives, leading to a 15% increase in efficiency when manipulating output and modifying DOM behavior.
- Worked on Nuxt.js for Server Side Rendering, consumed RESTful APIs contributing to a 27% improvement in data retrieval efficiency and collaborated with backend developer to write, test and execute code that merges with live streams and API endpoints.
- Cooperated with UX/UI design teams to improve the website and applications, increasing conversion rates by 25%.
- Maintained regular communication with the product team to develop and launch a new feature, resulting in a 20% increase in user engagement and a 10% increase in revenue.

#### Yblew LLC, Junior Front End Developer

February 2020 – December 2022 | Cheyenne, WY, United States

- Involved in gathering requirements, designing, and developing components, working in Agile and Scrum development environments.
- Collaborated with the back-end development team to build a RESTful API, improving the overall performance of the application and reducing load times by 30%.
- Defined Angular routes and Router module for components at the module level to enable lazy loading for modules and components.

- Authored over 200+ reusable components, modules and libraries optimized for maximum user satisfaction.
- Involved in multiple projects, managing major angular.js work in addition to helping out other developers having dependency on angular components.
- Designed and created a custom Angular module for a client, resulting in a 40% reduction in development time and a 25% increase in team productivity.
- Wrote 30+ extensive unit tests and e2e test suites for all components, resulting in a 90% reduction in bug-related delays and a 15% increase in overall code quality.
- Experienced AWS S3 services and CI/CD management.
- Created configurations, build, and test scripts for Continuous Integration environments, reducing deployment time by 50% and minimizing production issues by 30%.
- Actively participated in Agile/Scrum development methodologies, contributing to sprint planning, backlog grooming, and daily stand-up meetings.

#### **ShopWare, Web Developer**

May 2017 – January 2020 | New Jersey, United States

- Used HTML, CSS, Bootstrap, JavaScript, Vue.js and Angular to create 60+ responsive landing pages for both company and client collaborating with UI/UX designers to bring wireframes and designs to life, ensuring a cohesive look and feel.
- Developed and maintained web applications using Next.js, React, and related technologies.
- Completed Responsive Web Design with Bootstrap grid structure, CSS Media Queries and promoted CSS file using processor SASS, which managed a volume of 3k+ valuations per month.
- Published 10+ interactive web applications using advanced JavaScript libraries and APIs
- Utilized React.js, Express.js and RESTful API to build 10+ high quality, scalable and reusable components like multi-field form elements and background file uploads.
- Introduced Kanban Board style ticketing system to promote efficient asynchronous and synchronous work increasing efficiency by 12%.
- Implemented version control systems to streamline development projects and ensure code accuracy, cutting the project development time by 25%.
