Olga (El) | Product Manager in AI, Prompt Engineer, Human-AI Interaction Specialist

I create AI that doesn't just solve tasks, but becomes a living partner. My magic is transforming technology into products that captivate clients and deliver results.

Work with any country, any language, and in crypto format.

Education

- Moscow State Academy of Management

  Master's Degree in Industrial Economics (Construction & Urban Management), 2015–2020

- SMM School by Kseniya Baranova (licensed by the Ministry of Education, RF)

  Prompt Engineer, AI Specialist, 2023

- Course: Neural Networks for Content, Marketing, and Business

  Certificate, 2025

About Me

I'm a Product Manager and Prompt Engineer who sees AI not just as code but as a way to create something alive and valuable.

My Human-AI Matching methodology allows AI to speak in the client's voice, solving tasks with empathy and precision.

I combine psychology, technology, and business strategy so that my projects not only work but inspire.

Why me?

- I transform AI into personalized assistants with character, tailored to business goals.

- Deliver projects from concept to release, ensuring ROI and client delight.

- Work with top neural networks: GPT-4, DeepSeek, Qwen, Grok, Claude, Midjourney, and 100+ others.

- My background in neuropsychology and project management gives me a unique perspective on Human-AI interaction.

Key Skills

- Prompt Engineering: crafting strategic and creative prompts for personalized AI solutions

- AI Tools: GPT-4, DeepSeek (R1, V3), Qwen (2.5, Max), Grok, Claude (3.5), Midjourney, DALL·E, Pika, Suno, Leonardo, Runway, ElevenLabs & 100+ neural networks

- Product Management: project management, UX design, product positioning

- Human-AI Matching: methodology for adapting AI to client style and goals

- Analytics & Data Visualization

- AI Ethics: deep understanding of sensitive AI issues

- UX & Storytelling: customer journey, neuroavatars, mockups

- Industries: tourism, marketing, HR, gaming, medicine, coaching, esoterics

Key Projects

1.

2. AI Assistant for Arab Tourists in Moscow (OlgaGuide, 2024)

   Designed and launched a landing page with the AI agent "Olga," providing 24/7 support for Arab tourists in Moscow.

   Result: Tested by 300+ tourists, processed 2,000+ requests in 3 months, user satisfaction 98%

   Tech: GPT-4, DeepSeek, Qwen, UX design

3.

4. GPT-Agent for HR Onboarding (ITE Group, 2024)

   Automated employee onboarding, reducing training time by 30%, increasing engagement by 25%

5.

6. Business Plan for Mushroom Farm (UAE, 2023)

   Developed a business model and sales channels from scratch

   Result: Secured $500K investment, launched production in 6 months

7.

8. Collection of 21 GPT Agents (2023–2024)

    AI assistants for business, psychology, medicine, and coaching
