PREVIOUS WORKS

2022

Game Developer

CHAIN PIXEL LABS · Smartworking 📍

I worked for Chain Pixel Labs a web 3.0 oriented startup that builds games in the Blockchain world. During my work I participated in the creation of a videogame using the Javascript Phaser framework and I helped in the marketing area. All the work was done in English allowing me to gain experience in an international context.

2019-2020

Internship

AUDIO INNOVA · Padova 📍

I worked for Audio Innova a start-up spin off of the University of Padua in collaboration with the CSC center of computational sonology of the University of Padua, completing a complete Machine Learning elaboration starting from a set of raw data provided to me by a team of researchers. In particular I have created and tested various mathematical models for a supervised classification task (K-NN, SVM and Random Forest). The entire working procedure, together with the final statistical accuracy results, was published in a conference article.

2019-2020

Receptionist

MURIALDO AND FORCELLINI RESIDENCES · Padua 📍

The work, which took place from 00.30 to 08.00, consisted of: (i) night routines including control and closure of the structures (ii) vision of security cameras (iii) management of mobility for the entry / exit of workers and collegiate students (iv) opening morning of the facilities.
