SKILLS

Solidity

Java

PROFILE

Experienced blockchain developer adept in bringing groundbreaking, creative, and secure smart contracts to the ethereum blockchain. Knowledgeable in front-end smart contract integration using back-end and front-end frameworks that bring the best user experience for seamless web3 integration.

EMPLOYMENT HISTORY

Blockchain Developer, UnderdogzCapital LLC

San Francisco

Jun 2022 — Sep 2022

Created a decentralized hedge fund on the **ethereum blockchain** that allows members to claim dividends based off NFT ownership and DAO governance.

Skills Used:

- Solidity Smart Contracts
- GraphQL sub-graph data handling
- ReactJS
- etherJS
- JavaScript
- HTML & CSS

Blockchain Developer Intern, HuddIn.io

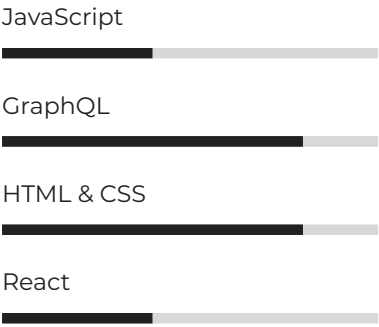

San Francisco

Apr 2022 — Jun 2002

Worked on a community based **ethereum protocol**, that allows owners of NFT collections to seamlessly set up decentralized voting leader boards pertaining to their community.

Skills Used:

- Solidity Smart Contracts
- GraphQL sub-graph data handling

EDUCATION

In attendance, San Francisco State University San Francisco

Aug 2021 — Present

Undergraduate student working towards a degree in **computer science**.

AWARDS
