Professional Summary

Innovative and results-driven Software Engineer with over 5 years of experience in Web, Mobile & Software Development, with a strong focus on Web3 technologies, trading bot creation, DeFi systems, and user experience design. Founder of Airdrop Nexus, I specialize in building smart, scalable digital products and have collaborated with projects like Mantra Network. I bring a unique combination of technical skills, design thinking, and blockchain expertise to deliver high-impact solutions.

Core Skills

- Web & Mobile App Development
- Front-End Development (React, HTML/CSS)
- Trading Bot Engineering (Automation & APIs)
- SEO Optimization & QA Testing
- Web3 & DeFi Tools Integration
- User Profile Systems
- Logo & Brand Identity Design
- Airdrop Campaign Management
- Time Farm Gamification
- Community Building (Telegram, Discord)

Work Experience

Software Engineer & Web3 Developer

Abdulsalam Ayomide Abdulsalam

Software Engineer | Web3 Builder | Trading Bot Developer

Airdrop Nexus | Remote

2019 - 2024

- Founded and scaled a Telegram-focused airdrop platform to thousands of users
- Built trading bots and Telegram mini-apps to reward user activity in real time
- Designed and deployed smart reward systems integrated with TON blockchain
- Managed SEO and QA processes across multiple Web3 campaigns
- Led user growth, UX improvements, and visual identity creation

Technical Contributor

Mantra Network | Remote

2021 - 2024

- Provided technical insights for project campaigns
- Supported smart contract testing, QA automation, and frontend tweaks
- Assisted in DeFi protocol usability and analytics monitoring

Education

Harvard University, Cambridge, MA

Bachelor of Science in Software Engineering

Graduated: 2019 | Duration: 5 years

- Specialized in decentralized applications and user interface design
- Capstone: 'Automated DeFi Strategy Builder with Token Incentive Layer'

Projects & Portfolio
