- Attended Solana Hackathon in Aug 2022 with Keila project.
- Built several blockchain smart contracts using Rust and Anchor framework, and Web3 integration as well.

Poly186, Log Angeles(LA), U.S—**Lead and CTO**
https://www.poly186.io

Oct. 2021 - Oct. 2022

- Built the website from scratch and worked as a member from the initial stage of the project.
- Made P8 token and liquidity pool based on Gnosis chain.
- Was building a Polyverse platform.

pimentaGROUP, Münster, Germany—**Lead Developer**
https://pimenta.group

May. 2020 - Nov. 2021

- Led the whole development team on several web platform projects including B2C, Booking, Fintech, Ecommerce etc.

SKILLS

Blockchain Space:
- Solidity
- Rust and Anchor framework
- Web3 integration
- Defi, Dapps, DAO, Dex

Web Space:
- React or Next.js (5 years)
- Redux or Mobx (5 years)
- React Native or Flutter (4 years)
- Vue or Nuxt.js (5 years)
- Angular (5 years)
- Node or Express (5 years)
- Python or Go or Ruby (3 years)
- PHP or Laravel (6 years)
- MySQL or MongoDB or Postgre
- CSS frameworks
- AWS/Heroku/Azure/Git
  - Deployment
  - Cloud Platforms (GCP)
  - Project Management Tools
  - Git and workflow

CERTIFICATION

React Certification (Triplebyte)
Node Certification (Triplebyte)
React Certification (HackerRank)
Python Certification
JavaScript Certification

- Mostly focus on the front-end development parts using React or Vue or Angular.
- Integrated build pipelines of 5+ complex applications to reliably use common rich-text editing components.

pimentaGROUP, Münster, Germany—**Senior Developer**
https://pimenta.group

Jan. 2018 - Apr. 2020

- Built the company website from scratch with Gabriel Morais as CEO and Founder.
- Expanded team members and migrated the platform from old (Angular 2) to new version (Angular 8).
- Integrated build pipelines of 5+ complex applications to reliably use common rich-text editing components.

primeKeeper, Kuala Lumpur, Malaysia—**Frontend Developer**
https://www.primekeeper.my

Feb. 2017 - Jan. 2018

- Implemented complex UI components with React/TypeScript and SCSS.
- Improved the UX by creating several DnD-based components.
- Built from scratch admin platform for managing database entities and users using React, Node.js, and Mongoose.
- Worked on providing API endpoints with Node.js and MongoDB.

EDUCATION

Osaka University, Osaka, Japan - *Bachelor of Computer Science*

Mar. 2011 - Aug. 2015

PROJECTS

YAKU Hub - Sep. 2022 - Nov. 2022 as *Frontend and Web3 Developer*

https://www.yaku.ai

Yaku Hub is your access pass to a smarter platform that delivers value to the ecosystem as a whole.

Worked on the front-end part using Next.js and integrated Web3.

SOL Flowers | Raffle - Apr. 2022 - Oct. 2022 as *Blockchain Developer*

https://raffle.solflowers.io/raffle

This is the raffle project that winners can receive the raffle NFT by buying tickets. You can buy tickets for $Sol and various tokens($FLWR, $SHDW, $DUST, $BOLT).

Built a smart contract using Rust on Solana and web3 integration.

COURSE

Rust (Udemy)
Solidity (Udemy)
React (Udemy)
JavaScript (Linkedin)

LANGUAGES

English - Upper Advanced
Japanese - Native

INTERESTS

Sports
- Enjoy watching soccer matches and playing games
- Crazy of **Real Madrid CF**

Hiking

SOCIALS

Linkedin
Twitter
Github
Telegram
Skype

Monkai | Multi-Chain Mint – Jun. 2022 - Aug. 2022 as *Smart contract Developer*

https://monkainft.com

Monkai is a Multi-Chain NFT experiment where we combine Ethereum and Solana along with community choice to bring forth innovative utility, community building, and an epic pvp metaverse.

I wrote mint contracts on Ethereum, Solana, and NEAR.

BASC NFT Staking V2 – Mar. 2022 - May. 2022 as *Blockchain Developer*

https://stakingv2.babyapesocialclub.com

This is an individual and matching pair staking on Solana and Users can stake BASC NFTs and earn $DAB token as reward.

I wrote the staking contract and web3 integration.

Mad Paws Dinner Bowl – Aug. 2021 - Dec. 2021 as *Lead Developer*

https://madpawsdinnerbowl.com.au

Mad Paws Dinner Bowl is Australia's one-stop shop for healthy, quality dog food delivered to customer's doors.

I built the whole logic from scratch using Next.js, Node, and MongoDB.

Events Smarter – Apr. 2019 - Nov. 2019 as *Senior Developer*

https://www.eventssmarter.com

Events Smarter welcomes users into a user-friendly experience that lets them share, create,follow, manage, and purchase tickets for an array of events.

I made this event platform using Vue and Laravel on both sides.

Hike Wild Montana – Jul. 2018 - Oct. 2018 as *Senior Web Developer*

https://wildmontana.org/hike

Montana is the platform where people and wildlife flourish because public lands and waters are wild and connected.

I wrote sub modules of Montana using React and Redux, and made trails and mark up using Mapbox GL.

Carefizz – Apr. 2017 - Sep. 2017 as *Web Developer*

https://lv.carefizz.com

This is a Health & Fitness site and they bring the most popular entertainment content directly to user mobile devices.

Attended this project as web developer to the front-end side using Vue.

OTHER EXPERIENCES

Application Development:

Developed various kinds of Apps and published to App Store or Google Play

G-Plans:
App Store
Google Play

Ownable:
App Store
Google Play

Open Source Contribution:

WeDance:
WeDance provides support for dance projects and their communities, furthering its mission of providing Open Source software for the public good.
Contributed to this project using Vue and migrating using Nuxt3.
WeDance
