ADDITIONAL INFORMATION

PUBLICATIONS

[hydrogen fuel cells storage and future in spite of other renewable energy resources](#) – 2021

hydrogen fuel cells have gotten increased attention recently, A fuel cell is an electrochemical device (a galvanic cell) that converts free energy of a chemical reaction into electrical energy (electricity), although Hydrogen fuel cells haven't been so recent future is definitely heading toward hydrogen fuel cells in both mobile and stationary applications, yet this is subjected to other renewable resources development and improvement with respect to hydrogen Fuel cells own development and improvement.

[making a drone and drone designing road map](#) – 2020

shortage on the implementation of technology, or the exploitation of the recent developments has led me to this project, where the main purpose is to provide a road map, that is technologically based for building airplanes for students, or of whom such matter might be of one's own interest, this might be a possible business proposition for providing educational purposes based kit for building airplanes. although the markets are full of models of airplanes that can be assembled or modified in different ways, these models are not meant for educational purposes, whereas my model uses SU-27 Sukhoi as a base airplane to demonstrate the project's objective.

[The Real Value of Small and Middle Size Enterprises Digitalisation](#)

Because of the rewards, new technologies are bringing, they have always dominated industries and businesses, the breakage of the 4.0th industrial revolution has demanded the digitalization of all industries, yet this process is a challenge for small and middle-sized businesses (SMEs) in terms of the rewards with respect to challenges. This study examines this process and draws the potential direction digitalization of SMEs will take.
