## Summary

I am a highly skilled developer with 8 years of experience in both mobile and web development, specializing in Flutter and ecommerce development. My expertise lies in developing high-quality Flutter applications from scratch, utilizing various features as per client requirements. Additionally, I possess extensive knowledge in web development, which enables me to create robust and scalable web applications. I follow structured programming patterns in my Flutter code to ensure efficient refactoring and re-use of the code in the future. Overall, my proficiency in both Flutter and web development allows me to deliver exceptional results for clients seeking top-notch applications and websites.
