Shahid Beheshti University - Tehran  
September 2020 to January 2023

### Bachelor's degree in Statistics

Shahid Beheshti University - Tehran  
September 2015 to September 2019

## Career Summary

### Full Stack Developer

SPAR Iran - Tehran  
September 2021 to Present

- Managed a team of 3 developers, including 2 junior front-end developers and 1 back-end developer, effectively communicating priorities and expectations for each project, as well as providing mentorship and guidance for the junior team members.
- Designed, developed, and successfully delivered 3+ software projects from ideation to deployment, utilizing a range of technologies and frameworks, including React, Angular, and .NET. Developed responsive and user-friendly interfaces, integrated third-party APIs, and optimized application performance.
- Contributed to data mining projects as a reviewer, providing insights and recommendations to improve data quality and analysis, as well as developing scripts and automated processes to streamline data processing and extraction.
- Collaborated with cross-functional teams, including product managers, designers, and quality assurance engineers, to ensure the timely delivery of high-quality software products that meet customer needs and exceed expectations.

## Full Stack Developer

Hediehchi - Tehran

February 2020 to March 2021

- As the sole developer of a web application from ideation to deployment, I took on a range of responsibilities, including requirements gathering, design, development, testing, and deployment. This involved working closely with stakeholders to understand their needs, designing a user-friendly and responsive interface, and implementing the application using modern technologies and frameworks.
- Throughout the project, I leveraged my strong problem-solving and troubleshooting skills to overcome technical challenges and ensure that the application met the highest standards of quality and performance. Additionally, I was responsible for managing the project timeline, communicating regularly with stakeholders, and ensuring that the application was delivered on time and within budget.

As a result of my efforts, the application was successfully deployed and has received positive feedback from users. This experience has allowed me to develop a strong foundation in full-stack development and a deep understanding of the entire software development lifecycle.

## Front End Developer

IranTalent - Tehran

December 2017 to August 2018

- Contributed to the development of the Irontalent.com platform as a front-end developer, working with a cross-functional team to build a user-friendly and responsive interface that provided job seekers with access to a range of employment opportunities.
- Took a leading role in the development of the IranSalary project, building the first version of the platform from ideation to deployment. This involved working closely with stakeholders to understand their needs, designing the application architecture, and implementing the platform using modern front-end technologies and frameworks.
- Throughout both projects, I leveraged my strong technical skills and attention to detail to ensure that the applications were high-quality, performant, and user-friendly. Additionally, I collaborated closely with cross-functional teams, including designers, back-end developers, and quality assurance engineers, to ensure that the applications met customer needs and exceeded expectations.

As a result of my efforts, both projects were successfully deployed and received positive feedback from users. These experiences have allowed me to develop a strong foundation in front-end development and a deep understanding of the entire software development lifecycle.
