# Lev Wang

SENIOR BLOCKCHAIN ENGINEER

## EXPERIENCE

### Senior Blockchain Developer

SILO FINANCE(FULLY REMOTE) | 05/2019 - 03/2022

Worked as Lead Blockchain Developer & Architect for a DeFi startup and also familiar with projects like Uniswap, Curve, NFT staking, marketplace.

- Worked on upgradeable contracts based on Escrow, Staking with reward issue, Token vault.
- Unit testing of smart contracts using Hardhat, Truffle with Javascript or Typescript.
- Familiarity with Slither to find vulnerabilities and monitor the gas consumption for each contract.
- Implemented and deployed the Graph for the staking contract tracking all events and allowing more advanced queries.

### Junior Blockchain and Web Developer

POINT NETWORK(FULLY REMOTE) | 09/2017 - 03/2019

Worked as Blockchain and Web Developer for a software company and participated in projects like ICO, Staking, DAO, NFT.

- Built smart contracts - Escrow, Game along with the architecture for a Betting Game - 'GPK.Battles'.
- Found an issue related to excessive on-chain RAM usage in Atomichub NFT protocol. Thereafter created an NFT protocol - OYA with smart contracts.
- Built a lot of websites such as booking website using MERN/MEAN and Wordpress/Laravel.
