- Documentation
- Communication Skills

EXPERIENCE

- Developed and implemented proprietary trading strategies for Forex markets, achieving consistent profitability and exceeding performance benchmarks.
- Designed and coded algorithmic trading bots to automate trade execution, optimize entry and exit points, and mitigate human error, resulting in increased efficiency and reduced transaction costs.
- Conducted thorough market research and analysis to identify high-probability trading opportunities, utilizing both technical and fundamental analysis techniques.
- Monitored and adjusted trading algorithms in real-time to adapt to changing market conditions, optimize risk management parameters, and maximize returns.
- Collaborated with cross-functional teams to integrate trading bots with proprietary trading platforms and third-party APIs, ensuring seamless execution and data integrity.
- Maintained comprehensive documentation and backtesting records of trading strategies and algorithms, facilitating performance evaluation, optimization, and regulatory compliance.
