PROJECTS

Currency Rate

WordPress Plugin Development

📅 2024

- Developed a WordPress plugin for managing currency exchange rates with custom tables.
- Created an admin interface for manual adjustments and automated updates.
- Integrated external APIs for real-time fetching and scheduled updates via cron jobs.
- Implemented shortcodes and dynamic calculations for flexible rate display.
- Optimized performance through efficient data management and caching.

Mall Management System

Backend Development

📅 2024

- Built a Flask-based backend with SQLAlchemy for efficient mall management.
- Implemented RESTful APIs with JWT auth and role-based access control.
- Created endpoints for store management, transactions, and reporting.
- Integrated real-time notifications for improved decision-making.

SQLiteTrim

Database Optimization

📅 2023

- Developed a tool to trim and optimize SQLite databases.
- Implemented automated data removal and CLI interface.
- GitHub: [SQLiteTrim](#)

SkyLaunch

OCI Deployment Tool

📅 2022

- Created a tool for deploying apps to Oracle Cloud Infrastructure.
- Automated environment setup and configuration.
- GitHub: [SkyLaunch](#)

OCI Automation

Resource Management

📅 2022

- Managed servers using Python and OCI API for resource allocation.
- Implemented automated task scheduling and IP management.
- GitHub: [OCI Instance Automation](#)

Trading Automation

Expert Advisors

📅 2021

- Developed expert advisors for MQL4 and MQL5 for automated trading.
- Implemented advanced algorithms and backtesting tools.
