- GraphQL
- Hasura
- Git

💼 EXPERIENCE

Viable ⧉
Senior Frontend Developer
10/2023 – Present | Oakland, CA, United States

- Initiated my journey as a Front-End Developer, working in close partnership with the Back-End Engineer, focusing primarily on rectifying front-end errors.
- Progressed to lead a significant UI overhaul aimed at elevating user experience, encompassing redesigns of result reports, sections, and themes.
- Successfully launched the updated version on ProductHunt, showcasing our dedication to continuous improvement (https://www.producthunt.com/posts/ask-viable).
- Continued to advance the UI post-launch with enhancements including a revamped left sidebar, the introduction of a multiline layout, and the integration of a bubble chart.

RexSoft ⧉
Full Stack Engineer
03/2020 – 09/2023 | New York, NY, United States
Developed or updated 20+ web products.

- Search Engine Optimization improvements for the customer's websites.
- Fix and maintain customer websites based on customer's requirements.
- Developed GraphQL API using Node.js, Express.js and MongoDB.
- Implemented various private APIs on a Node.js and PostgreSQL Back-End.
- Built Back-End APIs using Laravel best practice.
- Integrate Back-End APIs.
- Agile development and Server Management.

Knack ⧉
Junior Software Engineer
06/2017 – 01/2020 | Keller, TX, United States

- Designed and created 5 websites using HTML, CSS and Javascript libraries.
- Upgraded code and design of existing websites with JavaScript.
- Improved user experience using UX/UI tools resulting in a more than 50% increase in customer retention on platforms.

🎓 EDUCATION

Bachelor's degree
The University of Texas at Austin
09/2013 – 05/2017 | Austin, United States
