

# Solomon Ochepe

## Full-Stack Web Developer

I am a full-stack software engineer with over ten years of experience, specializing in back-end development with Laravel, Git, modularity, microservices, GitHub Actions, CI/CD, Agile methodology, Docker, API development, database design, and more. I excel in independent and team-oriented environments and have a proven track record of delivering high-quality projects. Passionate about continuous improvement and leveraging technology for business success, I also have strong communication skills and experience in training and mentoring.
