## SUMMARY

FullStack Developer with over 2 years of experience in building dynamic and scalable web applications, specializing in ReactJS and Node.js. Proficient in modern UI frameworks like Tailwind CSS, Material UI, and ShadCN. Skilled in developing robust APIs and integrating AI technologies in web solutions. Passionate about writing clean, maintainable code and delivering high-quality user experiences through seamless frontend-backend integration. Seeking to leverage my skills in a collaborative and innovative development environment.

## EXPERIENCE

### React Frontend Engineer

To-Go Mobility

January 2024 - Present

- Led the development of a full frontend system for a ride-sharing startup using React, Tailwind CSS, and Redux Toolkit.
- Implemented 30+ responsive pages, ensuring cross-device compatibility and fidelity to Figma designs.
- Collaborated closely with backend developers to integrate REST APIs, enabling real-time user management and dynamic data handling.
- Deployed and managed the app on Azure App Service.

### Fullstack AI UI Engineer

Freelance

March 2024 -June 2024

- Designed and developed a responsive AI chatbot UI for a client using React, Next.js, and TypeScript, increasing user engagement by 10%.
- Integrated authentication and chat functionality via secure API endpoints.
- Deployed the UI on Vercel, ensuring continuous updates and enhancements.

### Nodejs Backend Developer

Medix AI (Hackathon)

November 2023

- Developed backend API features to support the integration of AI components with the frontend.
- Documented and optimized API endpoints for authentication and AI communication.
- Contributed to a team that ranked in the top 10% of the hackathon.

## PROJECTS

### Fullstack CLI Chat Application

Terminal-Chat-APP ([terminal-chat-app.vercel.app/](#))

May 2023 - December 2023

- Built a real-time chat application with room creation and membership management, integrating React for the landing page.
- Gained 350+ downloads post-launch with a fully functional CLI interface and API backend.

### Nodejs QR code Generation Discord Bot

QR-BOT ([github.com/HayatsCodes/QR-Bot](#))

March 2023 - April 2023)

- Developed a Node.js bot for real-time QR code generation, allowing users to customize outputs.
- Integrated with Discord API for seamless user interactions, supporting 20+ active users.

### Nodejs Book Library API

Gutenberg-fiction-books ([github.com/HayatsCodes/gutenberg-fiction-books-api](#))

February 2023 - March 2023

- Built a robust API to access 20,000+ books from Project Gutenberg, implementing efficient database queries and pagination.
- Deployed the API on Cyclic.sh, optimizing for fast access and user requests.

## CERTIFICATIONS

Full Stack Web Development Certificate - University Of Helsinki - 2023

## SKILLS

Frontend: React, Redux, Tailwind CSS, Material UI, ShadCN, JavaScript, TypeScript, Next.js

Backend: Node.js, Express, MongoDB, REST APIs, Python

Tools & Deployment: Git, GitHub, Azure, Vercel, Cyclic.sh

Testing: Cypress, Jest, React Testing Library

Soft Skills: Problem-solving, attention to detail, teamwork, excellent communication, self-starter
