Full Stack | Blockchain Developer

@ otto.chen120@gmail.com   ♦ Munich, Germany

SUMMARY

Being involved in remote work my entire career has taught me to value two key traits, honesty and dependability. I've chosen to live my life by those traits, whether I'm in office in a meeting with my teammates or on the other side of the world, proactively finding a solution to some of our teams' hardest issues.

EXPERIENCE

Blockchain Developer   02/2021 - Ongoing
Upwork   Location

- Integrated ChainCoin interface (staking and yield farming page) using web3 with smart contracts.
- Developed smart contracts for decentralized lending platform on Ethereum blockchain.
- Designed efficient and optimized solutions to keep gas usage low.
- Audited smart contracts for NFT tokens and sales on Polygon/Matic.

Senior Full Stack Developer(Remote)   10/2017 - 01/2021
Symbio   Helsinki, Finland

- Developed and implemented front-end solutions for web applications using modern JavaScript frameworks (Vue, React).
- Collaborated with designers and other front end developers on UI/UX best practices, resulting in improved user experience.
- Developed and maintained a complex web application used by over 100,000 users to manage their finances.
- Built an API for the app using Spring Boot, Python/Django, NodeJS/Express, MongoDB, and ES6 features such as async functions and classes.
- Supervise junior developers, provide training and motivate team members.

Junior Full Stack Developer   04/2015 - 09/2017
Infochola   Jalan Bukit Merah, Singapore

- Built and maintained the company's website using PHP, MySQL, HTML5, CSS3 and JavaScript frameworks like Laravel, CodeIgniter, AngularJS.
- Collaborated with designers, copywriters, and senior developers to create compelling and user-friendly websites.
- Developed mobile-friendly version of ecommerce platform using AngularJS framework.
- Built a responsive email template that was compatible with all devices (smartphones, tablets, etc.).
- Learned to interact with clients, present designs and handle feedback on work. For this, used Github, Jira, Slack.
- Performed regular website maintenance, including updates and security patches, to ensure optimal website performance.

EDUCATION

Bachelor of Engineering   2011 - 2014
Nanyang Technological University   Nanyang Ave, Singapore

GPA | **3.6** / 4.0
