PERSONAL STATEMENT

I have a tremendous passion for anything that brings solutions through use and am a very ambitious and highly motivated person. I have an undergraduate Bachelor's degree in Telecommunications & IT and also a significant expertise in data analysis and data visualization. I'm excited to apply my knowledge and abilities to a position that involves Telecommunication and Software development. I am committed to my professional development and constantly look for ways to improve my skills in order to help the company and its stakeholders succeed.

CAREER OBJECTIVE

Professional Telecommunications Engineer who is highly motivated and results-oriented. I'm looking for an entry-level challenging career in the tech industry where I can use my great analytical skills, knowledge, and love for technology trends to help a reputable organization succeed.

EDUCATIONAL BACKGROUND

2022 November – 2023 March: Google Certificate in Data Analysis.

Relevant Coursework: Statistics & Probability, SQL for Data Analysis, Excel for Data analysis, Data Visualization, Data wrangling, R programming language with Statistical Analysis and Exploratory Data Analysis

2018 - 2022: Bachelor of Science in Telecommunication & IT, Machakos University.

Relevant Coursework: Telecommunications systems, Design and administration of a network, Wireless communication, Information System Security, Internet of Things (IoT), Data communication and networking, Software development, Database Management Systems, and Web application development.

2014–2017: Kenya Certificate of Secondary Education, Migori Township Secondary School.

Strong performance in Mathematics, Economics, and Business Studies.

2005–2012: Kenya Certificate of Primary Education, The Pentagon Academy.

EXPERIENCE

Freelancing of Full stack jobs where I have collaborated on few projects with other developers via GitHub pull requests (***Since October 2023***)

- Used React to develop interactive frontend UI.
- Used Node plus express for backend development.
- Used MySQL for creating, updating and altering the databases.
- Implemented Database backup and restoration logics using PHP and Java.
- Implemented Redis server for sessions storage, cookies and cache.

Networking Internship at Vint Ex Technologies under department of Telecommunications, Machakos (***Since August 2023-October 2023***)

- Installation of Wi-Fi and CCTV.
- Handled management of internet services for the company.
- IP configurations and networking.
- Fieldwork maintenance of the towers and getting new clients on board.

Full stack development (internship) at Vint Ex Technologies under department of software, Machakos (***Since January 2023-August 2023***)

- Work with cross-functional teams and senior developers to transform project

requirements into technical specifications.

- Use computer languages like HTML, CSS, JavaScript, and PHP to take part in the design and implementation of front-end and back-end components
- Contribute to the creation of user-friendly, responsive web interfaces that follow design standards and provide the best possible experience for users.
- To improve application functionality and allow smooth data sharing, integrate third-party APIs and services.
- Keep up with new frameworks, technologies, and best practices for full-stack development to continually improve your abilities and help the development process.
- Documenting project developments, code modifications, and technical requirements will help the team work together more effectively and share information.
- Participate actively in stand-up meetings, sprint planning, and retrospective sessions while working in an agile development environment.
- Perform routine testing and quality assurance to find and fix any problems or flaws.

Local Distribution Team Member at Naivas Supermarket in Machakos (Gas Supply Services) from ***December 2021-November 2022***.

- Used Telegram, WhatsApp groups, and social media to effectively promote gas supply services, which led to a significant rise in inquiries from potential customers and conversions.
- Developed targeted marketing programs and promotional activities in conjunction with the sales team.

Officer of Digital Marketing and Branding for Tylatash Security Systems *Machakos* (***Since December 2020-November 2023***)

- Oversee all facets of digital marketing strategy and objectives while leading the branding and marketing team.
- Developed and put into action thorough marketing strategies that significantly raised brand awareness and consumer engagement, used data analytics software to monitor campaign results and maximize marketing efforts.
- Used data analytics tools to monitor campaign effectiveness and maximize marketing initiatives.
- Worked with cross-functional teams to match marketing plans with corporate goals.
- Conducted market research to find chances for business growth and new trends.
- Improved production and efficiency within the marketing department as a result of streamlining internal processes.
- Through effective problem-solving and management of client interactions, high levels of customer satisfaction were achieved.
