## PROFILE

My name is Bello Mohammed Mahfuz, I am a software engineer with a track record of building high-performance, large-scale applications. I excel in collaborating with cross-functional teams to deliver products that meet user needs and drive business success. As a strong problem-solver, I am always eager to embrace new challenges and learn emerging technologies.

## TECHNICAL SKILLS

Python | React | MySQL | PostgreSQL | Github Actions | CI/CD | MongoDB | TypeScript | NodeJS | AWS

## PROFESSESIONAL EXPERIENCE

**Ankora Health**, Backend Engineer ✉ 2024/01 – present | Lagos, Nigeria

- Spearheaded the development of Ankora Health's backend infrastructure, ensuring scalability and robustness.
- Designed and implemented internal tooling, including a specialized web scraping API for comprehensive drug data extraction.
- Optimized backend processes, reducing latency and increasing system speed by 40%, enhancing overall efficiency

**Yebox**, Backend Engineer ✉ 2023/07 – 2023/12 | Lagos, Nigeria

- Engineered microservices using Express, Fastify, Node, Typescript, and Golang, enhancing app performance and scalability.
- Established CLI tooling for quick project setup, maintaining code quality via regular reviews.
- Collaborated with QA, enhancing code functionality, resolving issues faster, and minimizing bug reports.

**Hormoniousflo**, Full Stack Engineer ✉ 2022/05 – 2023/05 | London, UK

- Engineered a mobile application using Flutter, integrating essential features such as user authentication, a survey-based quiz system, payment processing, and comprehensive course management.
- Architected and optimized the website's landing page and blog using TypeScript and Next.js, leveraging advanced image optimization and server-side rendering to enhance site performance and user engagement.
- Developed a sophisticated admin dashboard with TypeScript and React.js, streamlining the management of courses, users, and recipes, and significantly reducing manual processing errors.
- Partnered with product designers to meticulously implement Figma designs, ensuring a cohesive and seamless user experience across all digital platforms.

## EDUCATION

**Mechanical Engineering (BSc.)**, University Of Lagos ✉ 2020/01 – 2026/07 | Lagos, Nigeria

## LANGUAGES

English — C1 | Yoruba

## PROJECTS

**Alaajo** ✉

Custom saving plans for users to meet financial goals, allowing them to save money alongside friends and peers through rotary contributions (Ajo/Akawo) or join a savings challenge.  
Loans And Payment features

**Kudibar** ✉

Kudibar enables users to effortlessly create, buy, and sell tickets for a wide range of events, including fashion fairs, live concerts, birthdays, conferences, and seminars. The platform simplifies event management, providing a seamless experience for both organizers and attendees.
