About me

Passionately exploring both spirituality and technology, as they each play a significant role in enhancing our lives and bringing more joy.

Experience

Project Manager

NUAH

2021 - Present

As a Project Manager, I have successfully led a variety of creative projects, including the development of games and card decks, coordinating the efforts of over 30 artists to bring these projects to fruition. My role extended beyond project management into marketing, where I played an integral part in content creation and ads on social media platforms such as Instagram and Facebook. I have been instrumental in expanding our team by recruiting volunteers globally and have been responsible for organizing hackathons that foster innovation and collaboration. My contributions to building databases and hiring personnel have been pivotal in streamlining operations, while my outreach to potential partners has significantly advanced the objectives of our NGO.
