- ✓ WordPress
- ✓ PHP basics
- ✓ Figma | Adobe | PixelPerfect
- ✓ GULP | Webpack

### REACT

- ✓ React junior
- ✓ Actively learning React
- ✓ TypeScript

## PROFILE

Do you need a person who's ready to read dozens of articles and watch dozens of videos to just learn about the best way of optimizing CSS animation?

Do you need a person who understands when it's better to use

```
{
  color: rgb(0, 0, 0);
  opacity: 0.8;
}
```

and when?

```
{
  color: rgba(0, 0, 0, 0.8);
}
```

**Then I am the person you need!**

## LANGUAGES

English

Russian

French

Why did I mention languages in my resume? Because I think for web developers languages are important since you can self-educate yourself from the greater amount of sources. That's why I'm currently learning French and after that planning to learn Chinese.
