SKILLS

Python/Flask/Django: 7 years

React/Next: 5 years

Vue/Nuxt: 4 years

Angular: 4 years

JavaScript/TypeScript: 9 years

PHP/Laravel/Symfony: 7 years

Node/Nest: 5 years

SQL/NoSQL: 4 years

Web3: 5 years

Golang: 4 years

Rust: 7 years

Solidity: 5 years

CI / CD: 4 years

AWS: 9 years

Docker: 9 years

About Me

Senior Software Developer with 7+ years of experience.
Experienced in numerous software technologies, with a focus on web and blockchain development.
Received a prize in ACM, which is part of ICPC, during my college years.
Led the development of a $150K research project that was recognized as a "silver standard" by the client. Increased the client's revenue twofold by fine-tuning AI/ML-based algorithms.
Deliver high-quality code and excel in communication.
Eager to contribute to the establishment of an impeccable online reputation by providing top-level customer support for start-ups and firms.
Worked on diverse projects for clients worldwide.
Proficient in building the architecture of backend systems and possess a keen eye for frontend development.
Specialize in Test Driven Development.

WORK EXPERIENCE

Senior Full Stack Developer

Feb 2021 - Present

- Strategic and management consulting for blockchain and cryptocurrency,from ICOs to capital raises to systems design.
- Backend development using Python/Django integrated Unit testing for backend systems and used to deploy servers to Digital Ocean using Docker.
- Integrated Django CMS using wagtail to build pages more easily and more fantastic.
- Built and launched Smart Contracts for Genesis NFT, Pod and Marketplace as well. Prefer to use ERC-721 based NFT rather than ERC-1155.
- Supported the DevOps team to automate CI/CD processes.
- Worked with Core Java to develop automated solutions to include web interfaces using HTML, CSS, JavaScript and Web services.
- Implemented complex UI components with React / Vue / TypeScript and SCSS.
- Developed pages routing capabilities for bookmarking, filters, validations and React components such as grid, buttons, carousels, date pickers, modal dialogs and other input components.

Senior Full Stack Developer

Ratio Finance

Feb 2017 - Jan 2021, USA

Course

• Solidity Smart Contracts:
Build DApps on Ethereum
Blockchain
Get Certificate, Udemy
July 2018 – Aug 2019

• Ethereum and Solidity:
The Developer's complete guide,
Udemy
Feb 2018 – June 2018

Hobby

• Skiing

• Volleyball

• Table Tennis

• Basketball

Language

• English

- Led seven members of a web development team.

  Managed projectusing github and manageteam members with ticketusing Clickup.

- Utilize Python/Django, PostgreSQL to implement scalable Full Stack Software solutions.

- Participate in the full lifecycle of development for company web applications using Django.

- Integrated Auth0 login and SendGrid API to send mail to users.

- Created restful APIs using Laravel and consumed them with React.js.

- Configured Google analytics module for tracking the visitors for the website.

- Strong programming experience in Laravel with sufficient exposure to Windows and Linux.

- Developed Responsive Websites that could be served by desktop, Tablets and mobile devices using React.js.

- Integrated payment system for product checkout using Authorize, payment API.

- Worked with JEST unit test framework to write unit tests for JavaScript code.

- Worked closely with the back-end team to display data using the Custom Components, library components, Redux, Redux-Saga.

- Worked with backend engineers to optimize existing API calls to create efficiencies by deprecating unneeded API calls.

Full Stack Developer

Mezurashico

Nov 2015 - Feb 2017 │ Japan

- Developed an E-commerce platform using React for frontend and NodeJS for backend.

- Developed Responsive Websites that could be served by desktop, Tablets and mobile devices using React.js.

- Integrated payment system for product checkout using Authorize, payment API.

- Worked with JEST unit test framework to write unit tests for JavaScript code.

- Worked closely with the back-end team to display data using the Custom Components, library components, Redux, Redux-Saga.

- Worked with backend engineers to optimize existing API calls to create efficiencies by deprecating unneeded API calls.

- Involved in all agile ceremonies like Daily stand-ups, Backlog pointing sessions, Planning sessions, retrospection, etc.
