OBJECTIVE

I am 20 years old, recently moved to Israel. I like to develop and research new technologies, I am constantly engaged in personal projects. Main fan of the web3 world.

EXPERIENCE

REMOTE
Sep 2022 - Present

Software Engineer
"Latoken"

I developed NFT marketplace in the team, development was carried out on Typescript, Java, python and solidity. I was responsible for the proxied backend that interacted with the blockchain. After two months of work, I was sent to develop a p2p service as the main backend developer

MOSCOW, Russia
Oct 2021 - Sep 2022

Backend Developer
"Blockchain Solutions"

Here, I was writing on python for back-end part, and use solidity for blockchain. Basically, the tasks were built from writing microservices and smart contracts. Message brokers such as Redis and CI/CD deployment tools were widely used.

MOSCOW, Russia
Sep 2020 - Oct 2021

Backend Developer
"ROSATOM"

Most of time I have developed REST API on Django and FastAPI frameworks. I spent a lot of time writing tests. Here I learned how to write secure code and effectively use OOP.

EDUCATION

MOSCOW, RUSSIA
2020 - Present
