

•INTRODUCTION

Edukasyon sa Pagpapakatao is the basic education curriculum that teaches grade school pupils and high school students character education, moral values and ethics. It supports the national education goal to provide a well-rounded education that will assist each individual in society to attain his or her potential as a human being and enhance the range and quality of the individuals within the group.

•BODY

Education is intentional and methodological to create a teaching and learning environment where students can reach their full potential.

Edukasyon Sa Pagpapakatao(ESP), with the help of parents and teachers, helps students to develop and manage their potential to realize their personality and desire to socialize in life better and become truly perfect beings emotional, spiritual, behavioral, and so on.

Edukasyon Sa Pagpapakatao(ESP) is a very important subject to guide every student to decide and act responsibly towards the common good. So in order to know if students learn anything about ESP, we conduct a 3rd grading grade survey of 10 students of grade 10 from JPNHS.

•PURPOSE OF THE STUDY

The purpose of our research is to know their grades and also to know if they know anything about ESP and if they also apply the good values to themselves that's is being teach by the teacher.

TABLE

CLASS INTERVAL	FREQUENCY(f)	CLASS MARK	Cumulative frequency(cf)	Lower boundaries(lb)	fM
98-100	1	98	10	97.5	98
95-97	4	97	9	94.5	388
92-94	4	92	5	91.5	368
89-91	1	91	1	88.5	91

$$98+388+368+91=945$$

$$945 \div 10(\text{number of students})=94.5\%$$

The average grade of the 10 students we interview about ESP is 94.5%. It's literally clear that the students we interviewed are studying and listening very well to their ESP teacher because of their HIGH GRADES. In our interview we just ask about their grades.

SUMMARY:

Based from the result that is being computed by us, it is clear that most of the students we interviewed have good grades, they learned and apply the ESP teachers discussion and the values that were being teach.

CONCLUSION:

Therefore, we, the researchers, conclude that most of the grade 10 students of JPNHS have good values and they find ESP 10 easy. We hope that this knowledge in ESP will remain.
