Hasanshin Damir

About me:

Hi there. I'm 20 years old. I would like to find a job in the world of cryptocurrencies. I have programming experience. I would like to develop my skills in other directions. I like to learn new things. I like to work with new information every day. I can also work as a copywriter or community manager. There is not much experience in these areas. But I think my desire to develop and study every day will help me achieve success in this field!
