Dmytro Hrechanyi

Full-Stack | AI Engineer | Blockchain Developer
Odesa, Odessa, Ukraine

Summary

Hello,

Thank you for taking a moment to peruse my profile. Allow me to present a concise overview of my competencies and strengths. I am characterized by strong organizational skills, a high level of efficiency, and self-motivation.

My success trajectory can be attributed to my adeptness at rapid learning, coupled with an unceasing aspiration to attain elevated personal and professional standards. With over eight years of immersive experience in the IT sector, I have functioned as an AI engineer and a senior Fullstack website developer for esteemed enterprises such as Intetics and MobiDev.

My portfolio also encompasses substantial mathematical research encompassing algorithms and data structures. I have spearheaded the conceptualization and implementation of educational systems, harnessing AI/ML and NLP technologies to remarkable effect.

Furthermore, my contribution to various platforms has yielded substantial results, driving visitor engagement to an impressive 180% increase.

A genuine ardor for cultivating pioneering concepts and fostering seamless collaboration with colleagues has underpinned my accomplishments as an AI engineer and senior web developer. My paramount objective has consistently been to surpass the expectations of both employers and clients. While this glimpse provides only a succinct insight, this ethos has been the cornerstone of my illustrious professional journey.

Thank you.

_____

Experience

Upwork freelance
Software Engineer
June 2023 - Present (3 months)
United States

Intetics
1 year 4 months

Senior Website Developer
February 2023 - August 2023 (7 months)
Ukraine

✔#Worked on the project and implemented DevOps practices, resulting in a 150% increase in efficiency in manipulating the project.
✔#Produced robust, well-organized code that is readily understandable by other team members.
✔#Made new application prototypes from the ground up, while also ensuring the stability of the production system.
✔#Achieved 120% proficiency with existing web applications using Node.js in a rapid manner.

Junior Website Developer
August 2022 - February 2023 (7 months)
Ukraine

✔#Constructed logical and efficient solutions and resolved four issues in the project.
✔#Carried out technical administration, development, and support duties for Information Services.
✔#Collaborated with customers, vendors, consultants, and Information Services staff in executing responsibilities.
✔#Created two tutorials to instruct new interns on the most effective practices in JavaScript.

Intern
May 2022 - August 2022 (4 months)
Ukraine

✔#Incorporated a third-party API into the existing website.
✔#Contributed to the planning, design, and construction of new user interfaces using React.
✔#Built interactive and responsive user interfaces that enhance end-user engagement.

✔#Involved in the ideation and wireframing of new interfaces

MobiDev
Generative AI Engineer
September 2022 - August 2023 (1 year)
Ukraine

✔#Developed and implemented advanced AI models using frameworks
like TensorFlow and PyTorch, including leveraging pre-trained models from
Hugging Face for efficient solutions.
✔#Optimized algorithms to enhance processing speed and efficiency, ensuring
seamless data analysis.
✔#Collaborated actively on innovative projects, applying AI to NLP and
computer vision tasks, while also incorporating tools like ChatGPT for
enhanced user interactions.
✔#Provided valuable technical leadership by offering guidance to junior team
members and fostering a collaborative learning environment.
