Summary

Senior Software Engineer with 10+ years of expertise in web and mobile development, boasting a successful track record of delivering superior products. Demonstrated proficiency in the Agile development process, consistently achieving excellent results across multiple full-time and long-term engagements with diverse organizations. Qualifications strengthened by a deep understanding of JavaScript libraries and frameworks, including React.js, React Native, Next.js and Node.

Experience

Clevertech | NY, New York

Senior Software Engineer | 10/2020 - 04/2025

- Built and maintained production-grade web and mobile applications using React, React Native, TypeScript, and GraphQL, integrating AWS services like Lambda, Cognito, S3, and DynamoDB.
- Performance improvements for complex UIs, including virtualized lists, data caching, and modular component refactors.
- Features such as real-time messaging, digital rewards, NFT collections, wallet integrations, and ticketing systems.
- Unit and E2E tests using Jest, Playwright, and React Testing Library, with CI/CD pipelines via GitHub Actions.
- Collaborated with cross-functional teams and mentored junior developers, promoting scalable architecture through NX monorepos and domain-driven design.

ClearSlide | CA, San Francisco

Senior Software Engineer | 11/2018 - 09/2020

- Designed and built a scalable sales engagement platform using microservices with Node.js and Django, integrating databases like MongoDB, MySQL, and PostgreSQL to manage content, user data, and analytics.
- Improved SEO and user experience by implementing Tailwind CSS and optimizing custom themes with best practices in HTML, metadata, and responsive design to boost content visibility.
- Built automated tests with Jest, React Testing Library, and Cypress to ensure reliable, high-quality sales tools.
- Managed Docker/Kubernetes deployments and used Terraform to provision scalable, high-availability infrastructure.
- Supported agile workflows using Jira, Git, and Slack to improve team collaboration and delivery speed.

Baytech Consulting | CA, Irvine

Full Stack Developer | 08/2015 - 10/2018

- Developed websites with component-based architecture, optimizing state management and frontend performance through reusable components.
- Supported migration of API integrations from REST to GraphQL, enhancing data fetching efficiency.
- Created reusable Django components and used the admin interface to streamline development.

Skills

React, React Native, Next.js, Node.js, AWS, Web3, TailwindCSS, MongoDB, SQL, Typescript, Agile, Communications

Education

University of West Georgia | Online

Bachelor's Degree of Computer Science | 05/2019

West Georgia Technical College

Associate Degree of Information Technology | 05/2015

Certificates

AWS Certified Solutions Architect
