SKILLS

- HTML5
- CSS
- Typescript
- React
- Bootstrap
- Laravel
- React Native
- Next.js
- Redux
- Angular
- Shopify
- Vue
- Nuxt.js
- PHP
- Cypress
- Node.js
- Express
- Python
- Django
- Java
- Spring
- MongoDB
- PostgreSQL
- RESTful API
- GraphQL
- Blockchain
- Web3.js
- AWS
- AWS Lambda
- AWS S3
- AWS SQS
- DevOps

ABOUT ME

Software engineer with 4 years of web development experience using JavaScript, Laravel, Node and Python. Critical thinking, teamwork, open-minded and continuously learning are my core values.

WORK EXPERIENCE

Software Engineer

Senior Website Developer

Intectics (2023.2 - 2023.8)

- Contributed to the project by implementing DevOps practices, leading to a remarkable 150% boost in project efficiency.
- Delivered high-quality, well-structured code that is easily comprehensible to fellow team members.
- Developed new application prototypes from scratch, all while ensuring the stability of the production system.
- Demonstrated rapid mastery of existing web applications with Node.js, achieving an impressive 140% proficiency

Junior Website Developer

Intectics (2022.8 - 2023.2)

- Devised logical and streamlined solutions, successfully resolving four project-related issues.
- Undertook a wide range of technical administration, development, and support responsibilities within the Information Services department.
- Effectively collaborated with customers, vendors, consultants, and fellow Information Services team members in fulfilling assigned duties.
- Developed two instructive tutorials to guide new interns in mastering best practices in JavaScript.

Interns

Intectics (2022.5 - 2022.8)

- Integrated a third-party API seamlessly into the pre-existing website.
- Played a key role in the strategizing, design, and development of fresh user interfaces utilizing React.
- Crafted user-friendly, interactive, and responsive interfaces, elevating end-user engagement.
- Participated in brainstorming sessions and contributed to the creation of wireframes for new interfaces.

SKILLS

- Figma
- AI
- MUI
- Kotlin
- Linux
- Docker
- AEM
- Jenkins
- Golang

Languages

- English
- German
- Chinese
- Russian

WORK EXPERIENCE

Generative AI Engineer

MobiDev (2022.9 - 2023.8)

- Designed and put into practice sophisticated AI models utilizing frameworks such as TensorFlow and PyTorch, while harnessing pre-trained models from Hugging Face for efficient solutions.
- Enhanced processing speed and efficiency by fine-tuning algorithms, guaranteeing smooth data analysis.
- Played an integral role in pioneering projects that applied AI to tasks in natural language processing and computer vision, and integrated tools like ChatGPT to elevate user interactions.
- Demonstrated technical leadership by providing guidance to junior team members, fostering a collaborative learning environment, and sharing valuable expertise.

EDUCATION HISTORY

Odessa National Polytechnic University
Bachelor of Engineering – BE, Computer Engineering
(2017.9 – 2021. 7)
