

Asher Li

Address	410 Rue Saint-Nicolas Montreal, QC, CANADA, H2Y 2P5 Canada	Phone	18106375450
Email	luckypoor321@gmail.com	Date of birth	21th of March, 1991
Nationality	Canadian	Links	LinkedIn , Github

01 PROFILE

Analytical, highly adaptable professional with solid experience designing and development cutting-edge software and web solutions/applications incorporation of technologies. Proven track record analyzing, defining, developing, testing, and cutting-edge software and applications consistent with unique client requirements. Highly instrumental in developing NodeJs, React applications, designing Restful API, and building micro services architecture. Adept at introducing advanced methods in resolving complex problems and maximizing user experience.

02 EMPLOYMENT HISTORY

05/2021 — 11/2022

Full Stack Developer at plentific

*119, 121 Cannon St,
London EC4N 5AT,
United Kingdom*

- Applied redux middleware using redux-promise, redux-thunk and redux-saga.
- Rebuild a massive part of an old-written application in React and Redux. As a result, the loading speed of an application improved at least 2 times.
- Outlined high-volume, high-scale web front ends for assets requiring responsive designs.
- Developed the Front-End and User Interface of application using JavaScript, ES6, React, and Redux.
- Added hooks in the project and moved some class-based components to functional components.
- Used File-Saver for BLOB downloads, React-Chart, Recharts for plotting charts. • Scaled the component interactions and generalized the interfaces using Restful webservice implemented on AWS Lambda.
- Drag-and-drop to-dos in the task calendar have been developed, allowing business owners to monitor and schedule actions according to their needs.
- Responsible for design and development of various components such as tab bars, map view, image picker, document picker, push notifications, sign-in/out features, profile management and navigation using react.
- Engineered login fronted functionality- including Restful service calls, key chain, credential storage, routing, token verification, and error notifications for international Buick and Chevrolet mobile applications.
- Implemented Twilio API, which allowed the end customer to organize a call center inside their application, and the company was able to profit from the provision of communication services.

- Build REST APIs including Transcription, Data Analysis using the AWS Lambda, GraphQL, Node.js, S3 bucket, EC2.
- Enforced Agile and Scrum development methodologies on interface projects under development times.

12/2019 — 04/2021

Web3 Developer at app.niftyleague.com

*200 Continental Dr Suite
401, Newark, DE 19713,
USA*

- Developed marketing website that is working on the Ethereum blockchain network.
- Used front end UI skills(React, Redux, TypeScript, MUI, SCSS, CSS, HTML, JavaScript)to adapt the Figma designs created by the designers.
- Worked in designing, developing and testing the web application by using theHTML5, CSS3, SASS, LESS, Bootstrap, and React.JS.
- Architect the front end structure and back end infrastructure.
- Enhanced the React Observables with Redux, React-router and Redux-thunk.
- Built Rest APIs with Node.js and Express.js Used AWS services such as S3, SNS, SES, and Lambda.
- Built out several features of their new market platform. I was tasked with developing several
- components in the application, adding features such as "Leaderboard", "Team", styling with MUI, and more.
- Achieved APIs calls from back end NodeJS using React Fetch.
- Worked in Agile Scrum environment. (sprint planning, daily scrum, sprint, sprint review and sprint retrospective) Worked closely with the backend and QA team in completing projects AndTroubleshoot any issues relating to frontend development
- Supported team members in their tasks.
- Facilitating open discussion and conflict resolution.
- Proactively identify and resolve issues.

06/2018 — 11/2019

Frontend Developer at INITIATE.AI

*11845 W Olympic Blvd
#1100w, Los Angeles,
California, 90064, United
States*

- Implementation of any 3rd party APIs required for task completion including OpenAi GPT- 3 models API for automation.
- Developed a brand new optimized design of main features on front end components including integrating text editing, and video editing tools to get ready for site launch.
- Optimizing components for responsive performance on desktop and tablet browsers.
- Maintaining and building reusable components for future use while creating property safe using mainly React Node and Typescript.
- Translating architectural design into efficient readable and reusable code using standard coding conventions.

- Worked in using React JS components, Forms, Events, Keys, Router, Animations and Flux concept. Used Web services (SOAP and Restful) for transmission of large blocks of XMUJSON.
- Implemented the Drag and Drop functionality using React-Draggable.

06/2017 — 05/2018

FrontEnd developer at BigBear.ai

*6811 Benjamin Franklin
Dr, Columbia, MD 21046,
United States*

- Designed CSS templates for use in all pages on the website working with CSS Background, positioning, text, border, margin, padding, and table.
- Applied optimization techniques to reduce page size and load times to enhance user experience using sprites.
- Developed user interface by using the React JS, Flux for SPA development. Used React-Router to turn application into Single Page Application.
- Used React-Auto complete for creating google maps location search on the web page Added Excel-Builder to download the Tabular data in Excel format using react.
- In Phase Two, worked closely with the Back-End team to display data using the Custom Components, library Components, and Redux.
- Added Dynamic Functionality by creating and dispatching Action Creators that deployed Actions.
- Used Object Oriented Programming concepts to develop UI components that could be reused across the Web Application. Extensively used Git for version controlling and regularly pushed the code to GitHub.
- Used JIRA as the bug tracking system to track and maintain the history of bugs/issues on everyday basis.
- Monitoring the offshore work and providing technical help to the offshore team for their JIRA tickets.
- Interacted with Testing Team, Scrum Masters and Business Analysts for fixing of Issues.
- Performed the System Testing, Regression Testing for Complete UI after fixing the Issues which are reported by Testing Team.

06/2016 — 05/2017

Full Stack developer at Tundra

*116 Sheridan Ave, San
Francisco, California,
94129, United States*

- Built reusable UI components using React.js, TypeScript and used Redux for state management.
- Built custom JavaScript timer linked to Twilio API to send text reminders 5minutes prior to take certain medications at specific times of day.
- Deploying Web site via various hosting solution Took sole responsibility for architecting and implementing the backed which managed social media API querying, cached API data, maintained historical and real-time datasets, stored user app data, and calculated popularity and demographic metrics

03/2015 — 05/2016

Full Stack Developer at Skytree, Inc

- Database designed and developed for website career stage.
- As a backend developer, worked with the fronted team to ensure the backend server and database were accessed easily and precisely. Payment systemwithStripe, PayPal.
- The old version of the website is at Constructed the Restful application usingNode.js as a server-side language

03 EDUCATION

Apr 2009 — Apr 2014

University of Toronto

Toronto

Bachelor's degree
