We create 3d magic for crypto

We offer high-quality 3d graphics for crypto projects.
Our skills and expirience help our clients reach the next level of design,
attract new clients and investment.

Type of 3d crypto content

✳ Illustration & Animation

Perfect to show services and processes.
Stylish and voluminous images are eye-catching.
Such a presentation helps to achieve a new level of design.

✳ 3d mascots

The mascot is a great way to promote your product/service in social media, you can use it to create advertising campaign and even entire branded cartoons. Using corporate colors, branding, and a pinch of creativity, we can bring your character to life.

✳ NFTs

Stylish single NFT or entire NFT collections are part of modern cryptoculture and business.
The volumetric image attracts attention better than 2D and drives the customer to make a positive decision about the purchase.
Beautiful reflections, realistic materials, dynamic lighting and animation are the components of top-level NFT.

✳ Assets for Play to Earn games

Each 3D game is filled with a large number of objects. Their quality and optimization determines the appearance and success of the project. This is what the players see in their screen and what they pay the most attention to. Our 3D models not only look great but also perfectly optimized for the game engine.

✳ Metaverse

We offer the creation of assets for Metaverse: environments, characters, weapons, etc.
Also a separate option that is popular is the creation of an animated presentation. Video presentation is used by our clients to find financial resources for further development.

✳ 3d Avatar

Metahuman for digital fashion shows, apps, brand advertising, and social media. Having one's own 3D avatar is part of digital culture and self-identity. Some brands use digital avatars-ambassadors. These digital personalities have their own social networks, lifestyle, and preferences.
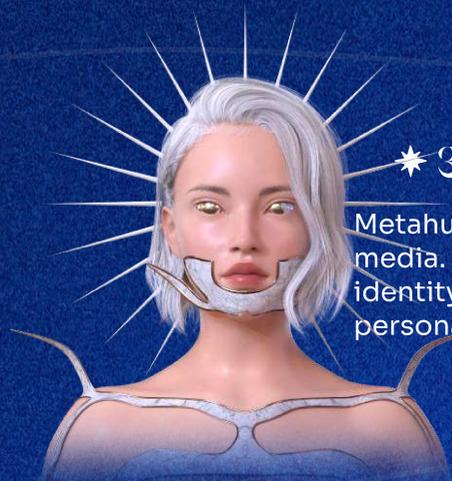

Our focus and attitude

Our focus is to create high-quality 3D graphics for companies around the world. Our professional approach to work and communication skills make us great partners for long-term cooperation. Apart from the skills and experience also our strong point is understanding what a particular business needs and transforming those needs into 3D. Before starting our work we carefully study the branding and activities of the company, which guarantees a special approach and a unique result for each client.
We love 3D and enjoy the work process.
