Objective

Seeking a position as a Community Moderator or Chat Assistant in a cryptocurrency project. My goal is to contribute to community growth, build a safe and engaging environment, and support the long-term success of the project.

In many crypto projects, up to 30% of the user base consists of Russian-speaking participants. I have deep understanding of this audience - their language, communication style, and behavioral patterns - which allows me to effectively build relationships, increase engagement, and support community development.

Key Skills & Experience

- **Crypto & Web3 Ecosystem:** Over 2 years of practical experience in testnets, airdrops, and node deployment.
- **Community Engagement:** Administrator and active member of several Russian-speaking crypto and Web3 Telegram groups.
- **Social Media & Networking:** Manage a crypto-focused Twitter account with 900+ followers. Actively participate in professional discussions and engage with the Web3 community on Twitter, Telegram, Farcaster, and LinkedIn.
- **Moderation & Support:** Experience in chat moderation, user assistance, conflict resolution, and maintaining a healthy community atmosphere (Discord, Telegram, Farcaster).
- **Multilingual Communication:** Fluent in Russian and Ukrainian, with basic conversational English. Comfortable using translation tools and motivated to improve language skills.

Project Participation

- **Testnets & Retrodrop Campaigns:** Monad, Tea, Linea, Base, Zora, zkSync, LayerZero, Scroll, Taiko, Initia
- **Node Setup & Management:** MyGate, Dawn, Nexus, Mesh, Nodepay, Multiple, BlockMesh, OpenLedger

Personal Qualities

- Fast learner and adaptable
- Highly responsible and detail-oriented
- Effective in both independent and team environments
- Committed to long-term project and community success

Education

Higher Education in Economics

Languages

Russian (native), Ukrainian (fluent), English (basic conversational)
