PROFESSIONAL EXPERIENCE

O&1 LTD

FRONTEND DEVELOPER

📍 Kent, United Kingdom (Remote)

Aug 2023 – Till now

A member of the technical team of O&1 LTD (delivers full-cycle software development services) as a frontend developer and cooperated in the production of 3 products.

- Implemented next JS web app templates based on modern methods to have a suitable and responsive application.
- Conducted extensive testing and validation of both web and mobile applications, identifying and resolving 20+ critical issues, ensuring a seamless final release with zero major defects reported post-launch.
- Developed and integrated multiple screens for the React Native application, enhancing user interface and experience; increased user engagement by 40%.
- Initiated different page modules with react JS plugins like carousel, accordions etc.
- Improved and compressed images were used in the project, up to 60%, to boost load speed and reduce server resource usage.

JADEH INC

FRONTEND DEVELOPER

📍 Tehran, Iran (Remote)

Jun 2022 – Jul 2023

- Participated in the national launch of **Jadeh**, a revolutionary cargo tracking platform, attracting thousands of active users within a few months through strategic marketing and user acquisition initiatives.
- Engineered the frontend of the Jadeh application, optimizing server requests to reduce overhead by over 20%, resulting in improved load times and enhanced user experience.
- Refactored the past codes from previous programmer to have new and updated code methods. Caused faster and safer application.
- Negotiated in the stack determination and needs assessment meetings about each 6 months.
- Partnered with the UI/UX expert about how to design the app to implement 100% synchronous html with user Interface (UI) design.
- Shaped new features for the 3 web apps. The more features increased with the agreement of users 2 times higher.
- Analyzed the +50 node packages and changed the code with the new methods.

NEGARGAR

FRONTEND DEVELOPER

📍 Rasht, Iran (Onsite)

Jun 2020 – May 2022

The biggest project of the company was Behzi with the aim of introducing all jobs in Iran, it officially started working. He was the main frontend developer in company and by cooperation with the product owner.

- Generated different vue js components to use many times. Which is 100% effective for don't repeat yourself (DRY).
- Created useful CMS for the admins with laravel blades to handle the view section, one of 3 parts of MVC.
- Built the pages exactly the same as the UI design. This increased 500+ views of site visitors.
