I'm "Bamdad Tabari" a web developer by profession. Due to my strong interest in the world of computers, I have researched various fields. As I said, I am a full stack .net programmer and I have been working in this field for 5 years. My chosen UI technology is Blazor. In addition to expanding my own experiences in this field. I also worked in the fields of security and artificial intelligence. And by integrating the mentioned sciences, I am building my own startup. Apart from these, I have started my own educational organization called "Dayana" and I am teaching Python and artificial intelligence to those who are interested in it.
