Education

2019 Singapore, Singapore	**Bachelor in Arts & Humanities,** *NUS (National University of Singapore)* ⧉

Professional Experience

01/2022 – 12/2022	**Designer/Writer,** *PC Magazine* ⧉ I worked for a company that published its own game magazine as an image designer for the articles, and sometimes I wrote the articles myself. I was responsible for creating the thumbnails and illustrations for the articles and worked with the editors to make sure all the images matched the theme and style of the site. I also did image processing to improve the quality and look of the images. Although I was happy to work for this company and learned a lot, after a year I decided to leave because I wanted more freedom and flexibility in my work. I wanted to manage my own schedule and use my experience in this business to grow my own business. Therefore, I am convinced that I can successfully develop my career as an independent designer and work independently. I also look forward to working with different companies and clients to diversify my work and continue to develop my skills. I have learned a lot during my year with this company, and I am sure it will help me in my future career.
03/2020 – 11/2021	**Graphic Design Coordinator,** *Whoosh* ⧉ I worked as a graphic design coordinator for a scooter rental company. I was responsible for creating promotional materials and maintaining the visual branding of the company. But after 1.5 years I decided to leave, because I wanted to work more independently and develop in the field of graphic design.
