Achievements

■ I have successfully completed over 12 SEO Content on different niche topics and have delivered edits and incorporated changes upon my team's recommendation.

■ I once worked with a team of four on an innovative idea we later pitched at the hult prize event in 2019. We worked on an innovation on improving the technology behind the cooking mechanisms adopted by africans that affects their health and causes thousands of deaths on yearly basis.

■ I have successfully completed over 15 whitepapers for different Crypto projects by developing concepts from the scratch from abstracts, introduction, problem statement, solution the crypto project seek to bring, how it seeks to achieve that, ecosystem on which it will be built, tokenomics and clear market prognostics.

■ I have successfully written over 10 technical contents for a client in about 7 months and those contents have ranked well on google attracting visitors and investors to his website and increasing his revenue generation.

■ Over the last two years and counting, I have traded both the Crypto and forex market with a consistent win rate of about 60%

■ I have also published articles on medium over the last few months.
