Experience

Turing - Senior Full Stack Developer

July 2021 - June 2022

Pay Crypto Global- Full Stack Developer

December 2017 - November 2020

Worked on the full software development life cycle from requirements gathering, system design to building, testing, deploying and maintaining code for a Canadian based Cryptocurrency Financial System. The system allows a customer to send and receive funds worldwide using cryptocurrency such as Bitcoin, Ethereum, Bitcoin Cash and USDC. Using Django and Graphene to build the backend API and model the database using PostgreSQL. The client Side is completely based on React and Apollo Client.

Augemek Tech - Full Stack Developer

May 2014 - August 2017

Worked on Customer Support Chat Application that Allow Admin to communicate with customers from a single dashboard.
