Profile

Experienced Front-End Developer with 4 years of building robust web applications using React, Tailwind CSS, HTML, CSS, and JavaScript. Passionate about creating visually stunning and user-friendly interfaces. Proficient in Python, Flask framework, and PostgreSQL for backend development. Dedicated to delivering seamless user experiences and ensuring efficient application performance.

Professional Experience

Software Developer, PomTech ICT Solution

2023 Sep – present
Herat, Afghanistan

- Developing web and mobile applications using React.js and React Native, ensuring a responsive design and optimal user experience.
- Creating reusable and efficient React components that enhance maintainability of the application.
- Implemente state management using Context API and Redux to ensure a smooth and predictable data flow within the application.
- Integrate RESTful APIs to seamlessly fetch and update data, enhancing the functionality and real-time capabilities of the application.

Software Developer, Lajward Technologies

2021 Feb – 2023 Sep
Herat, Afghanistan

- Assisted in developing and maintaining various front-end features for web applications using React and Python for backend services.
- Developed backend services using python and flask.
- Lead a team of 5 front-end and backend developers in the design and development of cutting-edge web applications.
- Gained experience in version control with Git, contributing to collaborative development efforts.
- Developed reusable components and UI elements, streamlining development processes and ensuring consistency across applications.
- Participated in regular team meetings and code reviews, contributing ideas and improvements to project deliverables.
- Gained exposure to responsive design techniques and accessibility standards.
- Assigned tasks and responsibilities to team members, ensuring efficient workload distribution and on-time project delivery.

Front end developer, Self Employed

2019 Jan – present
Herat, Afghanistan

- Worked as a freelance front-end developer on various online platforms such as laborx, completing projects for clients from diverse industries.
- Specialized in React development for freelance projects, including single-page applications, e-commerce platforms, and landing pages.
- Utilized React, HTML, CSS, and JavaScript to build interactive and user-friendly web applications and interfaces.
- Collaborated with clients to understand their project goals and translate their ideas into functional web solutions.
- Integrated third-party APIs and services to enhance the functionality of web applications as per client requirements.

Mobile based application, Social media app

2020 May – 2021 Aug

This app was a social media app. I used react native for front end and firebase for backend. I used modern design frameworks in this project. react router DOM for navigating between screens and react hooks for state management.
