- Current Location: Iran, Yazd
- Current Position: Network Security Expert
- Company: Amn Gostaran Farzan
- Military Service: Exempt
- Salary expectation: Negotiable

## WORK EXPERIENCE

---

**Sharif University Of  
Technology AICTC Center**  
📍 Iran, Tehran

👤 IT Administrator

📅 Jul 2007 - Jul 2008

My internship as an IT Administrator at AICTC was the starting point of my career in computer networking. I had started the MCSE 2003 training course just a few months before the internship and as I was very interested in this field, I enthusiastically completed the course as a Top Student.

**Pakshoo Industrial Group**  
📍 Iran, Tehran

👤 Senior Network Engineer

📅 Jul 2008 - Jul 2014

Initially, I started my career as a Helpdesk in this company, but due to my eagerness to learn, I was soon selected by the company's senior management as the leader of a three-person team, even though I was younger than the rest of the team. After that, I implemented virtualization technology for the first time in this company using HPE and VMware vSphere 4.0 servers. Communications between branches on radio platforms, Internet service and dedicated bandwidth, as well as maintaining and updating Microsoft services including Active Directory & Exchange Server and optimizing the routing and switching infrastructure with Cisco equipment and Backup & Recovery Solution were some of my experiences in this company that I did as R&D.

**PouraTeb**  
📍 Iran, Tehran

👤 Network Administrator

📅 Jul 2014 - Apr 2015

Although I started working at Pourateb as a Network Administrator, my focus was on

Microsoft Active Directory, Microsoft Exchange Server, Symantec Backup Exec, VMware vSphere and vCenter Configuration and maintaining these services on HPE servers and SAN Storage.

---

**PiraSys (Travand Raya Sepehr)**

📍 Iran, Tehran

Technical Sales Engineer

Apr 2015 - Dec 2017

PiraSYS is a service company in the field of infrastructure and network services. Small and medium-sized companies in various fields focus on their field of work by outsourcing computer network services to PiraSYS.

Considering the experiences, background and knowledge I had in computer networks, I worked as a sales engineer in charge of the department to provide appropriate solutions in the field of computer networks to customers, and my activities led to the signing of new contracts and attracting customers for PiraSYS. Among my successful contracts was cooperation with the laboratory technologies company at medirence.com, which led to the growth of PiraSYS in its field of activity.

Also, due to the company's need for specialized personnel to implement various projects, I was also active in the technical department to keep my technical knowledge up to date.

---

**I worked as a freelancer.**

📍 Iran, Yazd

Freelance (Network Administrator)

Dec 2017 - Oct 2023

I worked as a freelance computer network specialist for about six years with various medium-sized private companies. My services to these companies included design/redesign, implementation, support, security, maintenance, and updates.

Firewall installation and Implementation, communication between branches, installation and setup of Active Directory, DNS, DHCP, WSUS, WDS, IIS, FTP, Backup, Antivirus, Virtualizing, Mails Server etc. were some of my services to my clients. Also, documentation and preparation of proposals.

---

**Amn Gostaran Farzan**

📍 Iran, Yazd

Network Security Expert

Oct 2023 - Now

For more than ten years, Amn Gostaran Farzan Iranian (IT Security Engineering Company) has been operating as one of the most reputable companies active in the field of computer network security in Iran, with its main customers being government organizations and large companies across the country.

Summary of my duties as a network security expert

- 1- Harden equipment, servers, services, infrastructure and communications, Endpoints and workstations, operating systems, virtual machines, etc.
- 2- Extracting information and documenting the current status of computer networks.

3- Vulnerability analysis and preparing reports.

4- Preparing a security plan.

5- Implementing a security plan.

6- Support, maintenance and update.

I also have knowledge and experience in setting up and supporting the following:

Microsoft Windows Server & Services (Active Directory, DNS, DHCP, FTP, IIS, WSUS, WDS, Backup and etc.)

Cisco Devices & Solutions (Switches, Routers and ISE)

Firewalls (FortiGate Series, Sophos, Cyberoam, Kerio Control, pfSense etc.)

Servers and Storages (HPE, Dell, Supermicro, EMC, Synology etc.)

VMware vSphere and vCenter

Backup Solutions (Veeam Backup & Replication, Symantec Backup exec)

ManageEngine Tools and Solutions (Endpoint Central, ADManager, ADAudit, ServiceDesk etc.)

Antivirus, IPS, IDS, DLP solutions etc.

Other Network Devices (AP, SAN, NAS, DAS, SAN Switches etc.)

MikroTik RouterOS and RouterBoard.

## EDUCATION

---

**2003 - 2008**

*-Computer & Information Sciences -  
Bachelor(BSc/BA)*

**Iran, Yazd**

## ABOUT ME

---

I have had the pleasure of working with teams of the best network infrastructure and security experts in various companies for the past 17 years. Working with a variety of network services, equipment and brands has given me a deep understanding of the world of computer networking and has allowed me to play a significant role in driving business goals.
