

Dear, excellent designers

We are looking for designers who can design dozens of animals or other characters with 3D or 2D design with 4K, 8K and 12K resolution.

We want to implement 1000NFT 3D designs per animal or other characters with artistic designs automatically generated by the generative art algorithm.

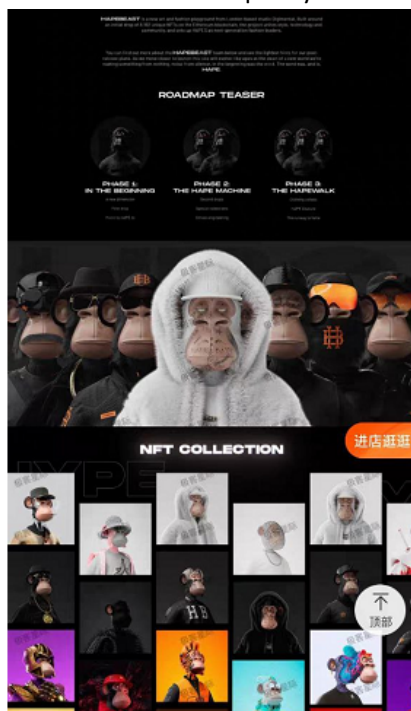

A total of 12 designs are being prepared, and we are preparing more than 90 characters now. Each design will be published in base model and 1000 nft.

All of the characters should be 3d designs if you are more confident in 2D, that's also okay, And then which is art generated by an algorithm.

**There are three types we want .**

### **The first : 3D nimal**

We like this feel and quality.

If you think ok, you think you can do a great job, we will write a contract and start the project right away.

Here is our PROJECT DETAIL

1. character: \*\*\*
2. Hats;Glasses;Earrings;Necklaces;Clothes;Sneakers;pants;Accessories .....  
the main concept is sports fashion (all of the trait should be different)  
Hole body,  
different facial expressions  
  
Traits :100
3. You think it's a fashion character avatar
4. male-female ratio (6:4) or (7:3)
5. Please pay attention to the background setting  
I want a background that fits the NFT. It's not a single background
6. Resolution is 4K ,8K, 12K  
(Different resolutions have different prices)
