SUMMARY

Highly skilled software developer bringing around 7 years of software design, development, and integration using modern Software Development Life Cycle methodologies and cutting-edge design patterns to deliver high-quality, robust solutions which meet all business needs. History of successfully implementing SaaS systems, standalone tools, RESTful APIs, web applications, and much more. An excellent team player with advanced knowledge of React, Angular, and Node.

SKILLS

React / React Native / Redux
Node.js / Express.js / Nest.js
Spring Boot / Hibernate

C# / ASP.NET
MySQL / PostgreSQL / MongoDB
PostgreSQL / MongoDB

Docker / K8 / AWS / CircleCI
Jest / JUnit / NUnit
Scrum Methodology

WORK EXPERIENCE

EFI

Senior Fullstack developer • 2019 - 2023

Orchestrated the entire SDLC, from project initiation to deployment, ensuring seamless development and release processes.

Architected RESTful APIs in Node.js to efficiently manage data retrieval and processing, improving application performance.

Leveraged Spring Boot and ASP.NET to design, optimize, and maintain backend services, leading to significant performance enhancements.

Managed database design, schema optimization, and data modeling for PostgreSQL, SQL Server

Collaborated with cross-functional teams to design and implement RESTful APIs using Node.js, enhancing data retrieval and processing efficiency.

Worked on backend services using Spring Boot and ASP.NET, optimizing performance and reducing response times.

Conducted regular code reviews, mentored junior developers, and promoted best coding practices.

Implemented and maintained robust CI/CD pipelines, automating the testing and deployment process, reducing manual errors, and accelerating the release cycle.

TSYS

Fullstack developer • 2018 - 2019

Managed the complete SDLC, including requirements gathering, design, development, testing, and deployment.

Spearheaded the development of a project management system with React and Redux, reducing project delivery times by 35%.

Built a Node.js-based RESTful API to integrate external services streamlining data exchange and reducing errors

Implemented robust authentication and authorization systems to enhance the application security

Implemented real-time features using WebSockets, enhancing user interaction within the application.

Designed and implemented Docker containers to streamline application deployment process, reducing manual errors, and accelerating the release cycle.

Played a key role in the development of web applications using ASP.NET and C#, gaining experience in the .NET framework.

Collaborated closely with UI/UX designers to create intuitive web and mobile interfaces, resulting in high user satisfaction

Viseven

Frontend developer • 2017 - 2018

Developed and maintained web applications using React, ensuring high-quality user interfaces and optimal user experiences.

Created responsive and visually appealing user interfaces, delivering a consistent look and feel across multiple platforms

Collaborated closely with UI/UX designers to create intuitive web and mobile interfaces, resulting in high user satisfaction.

Utilized Redux for state management and enhanced data flow, resulting in more maintainable and scalable applications

Conducted testing to identify and fix cross-browser compatibility issues, ensuring consistent user experiences.

Translated mobile app requirements into React Native code, delivering cross-platform applications for iOS and Android

Integrated RESTful APIs to fetch and display data, providing real-time information to users

EDUCATION

National Technical University of Ukraine 'Kyiv Polytechnic Institute'

Bachelor's degree, Computer Science • (May 2013 - September 2017)
