The Jobs I've always tried to do; can be described as simplicity. I am using simple parts; as the main elements of job. I believe it helps to maintain principles and eliminate redundancy.

- Improving My Software Abilities for better functionality in project perception
- Curious about the Green Architecture for the future of our planet
- Sustainability is the essential need of our future world and architecture, so this is important for me to extend my abilities for better performance in this field

FIELD OF INTEREST

Paying attention to sustainable architecture and considering the environment as a part of the building's function (and not as an obstacle to it) have always been among the things that have attracted my mind and attention. For this reason, I always tried to collaborate with like-minded groups and individuals in studies and design.

SOFTWARE SKILLS

Through the path of extension of my abilities at university and my career, I understand the importance of software in presenting my ideas to others:

- AutoCAD
- Autodesk Revit (Architecture)
- Sketch Up
- Lumion
- Adobe Photoshop
- Autodesk Inventor
- Rhino (familiar)
- Adobe InDesign (familiar)

EDUCATION

2016 – 2019
