Qalb E Habib

Senior Software Enginner | EVM | Solana

Faisalabad, Pakistan @ rana.habib313@gmail.com

Qalb E Habib   qalbehabib

Summary

Seasoned Web3 Developer with a knack for crafting seamless user experiences and robust smart contract integrations, eager to bring full-stack capabilities and blockchain acumen to your dynamic team.

Experience

SMIT   JUN 2021 - FEB 2022
Front-End developer   Faisalabad, Pakistan
🔗 SMIT

Netixsol   JAN 2022 - APR 2024
Full Stack Web3 & BlockChain   Faisalabad, Pakistan
Develoeper
🔗 Netixsol

Degen Markets   APR 2024 - Present
Full Stack Web3 & Software Enginner   Remote
🔗 Degen Markets

Projects

Netixsol   Feb 22 - Apr 22
Full Stack CMS app
🔗 Netixsol

Built a full-stack CMS application for **NetixSol** using MERN stack, Hygraph CMS, Next.js, and TypeScript, enabling efficient content management and seamless integration.

Array Capital   MAY 22 - NOV 22
Multichain DEX and launchpad
🔗 Array

Built a full-stack application for Array.Capital, integrating smart contracts for staking, farming, and a DEX with a seamless user interface on the multichain #RealYield launchpad.

MayFair   DEC 22 - APR 23
Smart Beta DTFs Issuer on Arbitrum
🔗 MayFair

Developed an interface for Mayfair Fund on Arbitrum, integrating smart contracts for leveraged DTF trading and revenue sharing from fees.

The Moonbase   MAY 23 - SEP 23
Decenterlized Ecosystem
🔗 The Moonbase

Moonbase Alpha is a decentralized platform with Exchange, Launchpad, DAO, and staking, powered by Arbitrum & zkSync, rewarding users through MoonRock and MoonDust.

Chance Protocol   JUN 23 - NOV 23
DEX & Lottery Dapp
🔗 Chance Protocol

Chance Protocol is a decentralized platform with Exchange, Launchpad, DAO, staking, and a lottery system powered by Chainlink RNG, Defender Autotask, and self-hosted GitHub Actions and built on the Ethereum and BSC chains.

Gemlaunch   SEP 23 - APR 24
🔗 Gemlaunch

Gemlaunch is a decentralized launchpad for token presales, IDOs, and liquidity pools, allowing projects to raise funds securely with features like liquidity locking and token vesting.

Degen Markets   APR 24 - Present
Prediction market on Solana
🔗 Degen Markets

Worked with DegenMarkets, collaborating with an incredible team to develop prediction markets on Solana using Solana Blink, Solana Actions, and Rust programs.Proficient in backend development with Node.js, PostgreSQL, AWS serverless, and webhook integrations. Skilled in creating responsive Web3 interfaces and automating deployments with Docker, Linux, and CI/CD pipelines.

Skills

● ● ● ● ○

Javascript, Typerscript, Next.js, React.js, Ethers, Wagmi, Web3, Solana, AWS, Github Actions, CI/CD, Nginx, PWA, VPS, Linux, WSL, Hardhat, Rust, Solidity, Remix, Mongodb, Postgress, ORM, ServerLess, NodeJs, Nest.Js, Monorepo, TurboRepo

Education

GC University   **SEP 2018 - Sep 2022**
Computer Science   BSCS
3.8 GPA
